Important Information for the selection of your motorhomes

When buying a motorhome, camper van or urban vehicle (hereafter: motorhome), it is particularly important to choose the right layout and an appealing design. In addition, weight also plays an essential role. Family, friends, optional equipment, accessories and baggage – space must be available for all of these. At the same time, there are legal and technical limits to the configuration and load. Every motorhome is designed for a certain weight, which may not be exceeded during driving.

For motorhome buyers, this raises the question: How should I configure my vehicle to accommodate passengers, baggage and accessories according to my needs without the vehicle exceeding this maximum weight? In order to make this decision easier for you, we provide you below with a few tips that are particularly important when selecting your vehicle from our portfolio:

1 The technically permissible maximum laden mass ...
... is a value set by the manufacturer which the vehicle may not exceed. Dethleffs specifies a layout-related upper limit for the vehicle, which can vary from layout to layout (e.g. 3.500 kg, 4.400 kg). You can find the corresponding specification for each layout in the technical data.

Technical info		Model 1	Model 2
Standard chassis		Fiat Ducato	Fiat Ducato
Emission standards		Euro 6d Final	Euro 6d Final
1 Technically permissible maximum laden mass	kg	3499	3499
2 Mass in running order	kg	2.890 (2.746 - 3.035)*	2.982 (2.833 - 3.131)*
Permitted number of seats (including driver)		4	4
Manufacturer-specified mass for optional equipment	kg	245	149

2 The mass in running order ...
... consists – to put it simply – of the basic vehicle with standard equipment plus a standard weight of 75 kg for the driver. It is legally permissible and possible for the mass in running order of your vehicle to deviate from the nominal value stated in the sales documents. The permissible tolerance is ± 5 %. The permissible range in kilograms is given in brackets after the mass in running order. In order to provide you with full transparency regarding possible weight deviations, Dethleffs weighs each vehicle at the end of the line and informs your trade partner of your vehicle's weighing result for forwarding to you. **Detailed explanations on the subject of mass in running order can be found in the "Legal Information" section.**

3 The permitted number of seats (including driver) ...
... is determined by the manufacturer in what is referred to as the type-approval procedure. This results in what is referred to as the mass of the passengers. For this, a standard weight of 75 kg per passenger (without driver) is calculated. **Detailed explanations on the subject of mass of the passengers can be found in the "Legal Information" section.**

Technical info		Model 1	Model 2
Standard chassis		Fiat Ducato	Fiat Ducato
Emission standards		Euro 6d Final	Euro 6d Final
Technically permissible maximum laden mass	kg	3499	3499
Mass in running order	kg	2.890 (2.746 - 3.035)*	2.982 (2.833 - 3.131)*
3 Permitted number of seats (including driver)		4	4
4 Manufacturer-specified mass for optional equipment	kg	245	149

4 The manufacturer-specified mass for optional equipment ...
... is a value set by Dethleffs per layout for the maximum mass of optional equipment that can be ordered. This limit is intended to ensure that the minimum pay-mass, i.e. the legally prescribed free mass for baggage and retrofitted accessories, is actually available for the vehicle load capacity of the vehicles delivered by Dethleffs. If, in exceptional cases, the weighing at the end of the line nevertheless shows that the actual load capacity falls short of the minimum pay-mass due to a permissible weight deviation, we will check together with your trade partner and you whether we should, for example, increase the load capacity of the vehicle, reduce the number of seats or remove optional equipment before delivering the vehicle. Detailed explanations on the subject of the effects of the tolerances on the minimum pay-mass and the payload can be found in the "Legal Information" section.

Optional equipment*	Included in package	Price €	Additional weight (kg)*	Code	Model 1	Model 2
Bathroom						
Shower grid	—	399,-	9	1385	—	○
Additional window in bathroom	—	269,-	5	9845	○	○
Multimedia						
Automatic HD satellite system 65 Twin	—	549,-	15	713	○	—
Dethleffs Naviceiver incl. DAB+, truck navigation and connection to on-board control panel		238,-	1,5	1657	○	●

5

5 The additional weight of optional equipment and packages ...
... increases the actual mass of the vehicle (= mass in running order plus selected optional equipment) and reduces the pay-mass. The specified value shows the additional weight compared to the standard equipment of the respective layout. The total weight of the selected packages and optional equipment must not exceed the manufacturer-specified mass for optional equipment.

Globetrail Active Plus

Upgrade your van life with the new Globetrail Active Plus. Boasting a rugged off-road look, smart space solutions and a host of extras included as standard in the Active Plus package, it's the perfect choice. Experience the 'Plus' with every mile: a 160 hp (118 kW) engine paired with an automatic transmission, advanced driver assistance systems and a fully-featured multimedia setup are all included as standard. With five model variants across different size classes, you're sure to find a Globetrail Active Plus with just the right amount of space for your travels.

Upholstery

Upholstery Pluto

Wood décor

Wood décor finish Noce Nagano, Decorative trim Linum

Plus factors

- The attractive Active package, featuring additional highlights compared to the Active package
- Excellent price-performance ratio in market comparison
- Ready-to-Roadtrip: Clever complete package for immediate freedom on four wheels
- Plenty of storage space throughout the vehicle
- A comfortable, naturally lit bathroom with a swivel shower and a roller door, offering plenty of space to move around
- Superior sleeping comfort thanks to a mattress with a breathable mesh layer
- A modern and cosy design featuring a combination of wood and grey, with handle-free overhead cupboard doors and soft-close mechanisms (ergonomic operation)
- Flush-fitting windows for better protection against break-ins and improved appearance
- Ceiling spotlights create a bright atmosphere

○ Optional equipment — Not possible ● Standard equipment ◆ Mandatory △ Not known at the time of publication

*** INFO** The specified mass in running order is a default value defined in the type-approval procedure. Due to manufacturing tolerances, the actual weighed mass in running order may deviate from the value stated above. Deviations of up to ± 5 % of the mass in running order are legally permissible and possible. The permissible range in kilograms is given in brackets after the mass in running order. The manufacturer-specified mass for optional equipment is a calculated value for each type and layout that Dethleffs uses to determine the maximum weight available for factory-fitted optional equipment. The limitation of optional equipment is intended to ensure that the minimum pay-mass, i.e. the legally prescribed free mass for baggage and retrofitted accessories, is actually available for the vehicle load capacity of the vehicles delivered by Dethleffs. The real weight of your vehicle ex works can only be determined when it is weighed at the end of the line. If, in exceptional cases, the weighing shows that the actual load capacity falls below theminimum pay-mass despite limiting the optional equipment due to a permissible weight deviation, we will check together with your trade partner and you whether we should, for example, increase the load capacity of the vehicle, reduce the number of seats or remove optional equipment before delivering the vehicle. The technically permissible maximum laden mass of the vehicle and the technically permissible maximum mass on the axle must not be exceeded. Detailed information & explanations on the subject of weight and the configuration of the vehicle can be found in the section Legal information. For a more detailed description of all mandatory technical dependencies, please refer to the explanations on the footnotes.

*** INFO** The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for optional equipment shown in the model overviews. This is a calculated value for each type and layout that Dethleffs uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and explanations on the subject of weight can be found in the Legal information section.

AC-PP Active Plus Package

*** INFO** The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for optional equipment shown in the model overviews. This is a calculated value for each type and layout that Dethleffs uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and explanations on the subject of weight can be found in the Legal information section. An increase of load capacity increases the manufacturer-specified mass for optional equipment. The increase results from the higher pay-mass due to the alternative chassis. The increased tare weight of the alternative chassis and, in particular, the weight for any mandatory heavier engine variants (e.g. 180 hp) must be deducted from this. For a more detailed description of all mandatory technical dependencies, please refer to the explanations on the footnotes.

*** INFO** The items listed in this category are original Dethleffs parts and accessories that are retrofitted to the vehicle after delivery from the factory and not under the responsibility of the manufacturer. Original Dethleffs parts and accessories retrofitted to the vehicle affect the load capacity as well as the mass on the axle. Please note that the technically permissible maximum laden mass of the vehicle as well as the technically permissible maximum laden mass on the axle must not be exceeded even after fitting the original Dethleffs parts and accessories. Detailed information and explanations on the subject of weight can be found in the Legal information section.

Accessory Equipment*

Please note that the prices listed in this category are the recommended retail price of our original accessories. Additional assembly costs may be incurred for the subsequent assembly of the original accessories by your dealer.

Globetrail (Fiat)

Dethleffs' many years of experience in building leisure vehicles is clearly reflected in the Fiat Ducato-based Globetrail. In terms of quality, ambience and sophisticated solutions it is streets ahead of other camper vans. An attractive price-performance ratio and a wide range of different vehicle concepts – from compact to spacious – are the icing on the cake, making the Globetrail the perfect choice for camper van enthusiasts and newcomers alike.

Upholstery

Upholstery Camino

Upholstery Scandi ○

Plus factors

- Excellent chassis equipment: 16-inch aluminium wheels, leather steering wheel, air conditioning, cruise control, electric parking brake, captain's chairs, blackout blinds and much more.
- Disc spring sleep system with full-length disc springs for high comfort, fold-up step for accessing the bed and optional stair access. Single beds can be extended to form a family bed.
- Modern, ergonomic interior design with handleless, optional backlit overhead locker doors and an inviting, illuminated shelf at the entrance.
- Easy loading of the rear garage thanks to fold-up beds
- Large, spacious drawers with soft-close in the kitchen
- Extensive standard equipment including fly screen door, window in the bathroom, rear shelf, all-round overhead lockers in the bedroom and much more.
- 10-year tightness guarantee!

○ Optional equipment — Not possible ● Standard equipment ◆ Mandatory △ Not known at the time of publication

*** INFO** The specified mass in running order is a default value defined in the type-approval procedure. Due to manufacturing tolerances, the actual weighed mass in running order may deviate from the value stated above. Deviations of up to ± 5 % of the mass in running order are legally permissible and possible. The permissible range in kilograms is given in brackets after the mass in running order. The manufacturer-specified mass for optional equipment is a calculated value for each type and layout that Dethleffs uses to determine the maximum weight available for factory-fitted optional equipment. The limitation of optional equipment is intended to ensure that the minimum pay-mass, i.e. the legally prescribed free mass for baggage and retrofitted accessories, is actually available for the vehicle load capacity of the vehicles delivered by Dethleffs. The real weight of your vehicle ex works can only be determined when it is weighed at the end of the line. If, in exceptional cases, the weighing shows that the actual load capacity falls below theminimum pay-mass despite limiting the optional equipment due to a permissible weight deviation, we will check together with your trade partner and you whether we should, for example, increase the load capacity of the vehicle, reduce the number of seats or remove optional equipment before delivering the vehicle. The technically permissible maximum laden mass of the vehicle and the technically permissible maximum mass on the axle must not be exceeded. Detailed information & explanations on the subject of weight and the configuration of the vehicle can be found in the section Legal information. For a more detailed description of all mandatory technical dependencies, please refer to the explanations on the footnotes.

*** INFO** The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for optional equipment shown in the model overviews. This is a calculated value for each type and layout that Dethleffs uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and explanations on the subject of weight can be found in the Legal information section.

95-P 95 Years Package

*** INFO** The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for optional equipment shown in the model overviews. This is a calculated value for each type and layout that Dethleffs uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and explanations on the subject of weight can be found in the Legal information section. An increase of load capacity increases the manufacturer-specified mass for optional equipment. The increase results from the higher pay-mass due to the alternative chassis. The increased tare weight of the alternative chassis and, in particular, the weight for any mandatory heavier engine variants (e.g. 180 hp) must be deducted from this. For a more detailed description of all mandatory technical dependencies, please refer to the explanations on the footnotes.

95-P 95 Years Package

*** INFO** The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for optional equipment shown in the model overviews. This is a calculated value for each type and layout that Dethleffs uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and explanations on the subject of weight can be found in the Legal information section. An increase of load capacity increases the manufacturer-specified mass for optional equipment. The increase results from the higher pay-mass due to the alternative chassis. The increased tare weight of the alternative chassis and, in particular, the weight for any mandatory heavier engine variants (e.g. 180 hp) must be deducted from this. For a more detailed description of all mandatory technical dependencies, please refer to the explanations on the footnotes.

Accessory Equipment*

Please note that the prices listed in this category are the recommended retail price of our original accessories. Additional assembly costs may be incurred for the subsequent assembly of the original accessories by your dealer.

Globetrail Performance (VW)

Discover the Globetrail Performance – a high-end camper van based on the VW Crafter. With premium features, an innovative centre bathroom and a spacious French bed, it sets new standards for comfort on the road and at the campsite. Experience camping on a whole new level.

Upholstery

Upholstery Scandi

Wood décor

Wood décor Amberes Oak

Plus factors

- Floor-level centre bathroom with high-quality folding washbasin
- Extra large lying surface in the 6 m vehicle of 2 m x 1.40 m
- Bench seat with backrest tilt adjustment for optimum passenger travel comfort
- High-quality assistance systems such as the ‘Discover Media’ navigation system, Light Assist, Advanced Assistance Package and much more.
- 163 hp (120 kW) with 8-speed automatic transmission as standard
- Textile wall covering in felt look
- 10-year tightness guarantee!

○ Optional equipment — Not possible ● Standard equipment ◆ Mandatory △ Not known at the time of publication

*** INFO** The specified mass in running order is a default value defined in the type-approval procedure. Due to manufacturing tolerances, the actual weighed mass in running order may deviate from the value stated above. Deviations of up to ± 5 % of the mass in running order are legally permissible and possible. The permissible range in kilograms is given in brackets after the mass in running order. The manufacturer-specified mass for optional equipment is a calculated value for each type and layout that Dethleffs uses to determine the maximum weight available for factory-fitted optional equipment. The limitation of optional equipment is intended to ensure that the minimum pay-mass, i.e. the legally prescribed free mass for baggage and retrofitted accessories, is actually available for the vehicle load capacity of the vehicles delivered by Dethleffs. The real weight of your vehicle ex works can only be determined when it is weighed at the end of the line. If, in exceptional cases, the weighing shows that the actual load capacity falls below theminimum pay-mass despite limiting the optional equipment due to a permissible weight deviation, we will check together with your trade partner and you whether we should, for example, increase the load capacity of the vehicle, reduce the number of seats or remove optional equipment before delivering the vehicle. The technically permissible maximum laden mass of the vehicle and the technically permissible maximum mass on the axle must not be exceeded. Detailed information & explanations on the subject of weight and the configuration of the vehicle can be found in the section Legal information. For a more detailed description of all mandatory technical dependencies, please refer to the explanations on the footnotes.

Standard equipment

	600 DR Classic	600 DR Advantage
Basic vehicle VW		
VW Crafter high roof 140 (2.0 l / 140 hp / 103 kW) - 3,500 kg permissible total weight	●	–
VW Crafter high roof 163 (2.0 l / 163 hp / 120 kW) - 3,500 kg permissible gross weight - Automatic transmission [13)]	–	●
Basic vehicle equipment VW		
"Lane Assist" lane departure warning system	●	●
12 V socket and 4 cup holders in the dashboard	●	●
12 V sockets in the driver's cab (one in the control panel, with an additional one in the left-hand seat frame for left-hand drive vehicles)	–	●
Air conditioning with manual control in the driver's cab	●	●
Airbag for driver and front passenger with passenger airbag deactivation	●	●
Anti-lock braking system (ABS)	●	●
Attention and fatigue warning with driver observation camera	●	●
Central locking with keyless start system "KeylessStart"	●	●
Central locking with radio remote control, interior actuation and safe locking system	●	●
Crosswind Assist	●	●
Digital cockpit (medium)	●	●
Digital radio reception (DAB+)	●	●
Distraction and drowsiness detection	●	●
Electronic parking brake	●	●
Electronic stabilisation programme and ABS	●	●
Emergency call system eCall for Composition Audio, prepared for "We Connect	●	●
Engine start-stop system with brake energy regeneration	●	●
Exterior mirror left and right, convex, with integrated LED indicator and wide-angle range	●	●
First aid kit, warning triangle and safety vest	●	●
Front Assist with warning and braking for vehicles, pedestrians and cyclists	●	●
Front axle, reinforced (axle load 2,100 kg, with twin tyres 2,200 kg)	●	●
Front bumper in grey with painted trim in body colour	–	●
Fuel tank with 75 l tank capacity	●	●
Halogen twin headlamp	●	●
High roof, exterior painted in car colour	●	●
Hill Start Assist	●	●
Hinges for rear wing doors with enlarged opening angle	●	●
Laminated glass windscreen in heat insulating glazing	●	●
Lismore" 6.5 J x 17 alloy wheels [13)]	●	●
Multifunction leather steering wheel	–	●
Multifunction steering wheel (not leather)	●	–
On-board tool	●	●
ParkPilot at the front and rear	●	●
Preparation for trailer device (incl. trailer stabilization) with cable set and control unit [13)]	–	●
Puncture kit - Tire Mobility Set: 12-volt compressor and tyre sealant	●	●
Radiator grille unpainted	●	●

Standard equipment

	600 DR Classic	600 DR Advantage
Radio Composition with 26 cm (10.4") touch colour display with 4 speakers	●	–
Region code " ECE " for radio	●	●
Sicherheitsinnenspiegel manuell abblendbar	●	●
Step lighting front	–	●
Stone chip protection for the front underbody	●	●
Storage Package 2	●	●
Summer tyres	●	●
Sun visors, two folding and side-swivelling, on the passenger side with wide-angle mirror	●	●
Suspension/damping, reinforced and stabilisation, reinforced	●	●
Swivel seat left, with two armrests	●	●
Swivel seat right, with two armrests	●	●
Three-point automatic seat belts with front belt height adjuster and electric belt tensioner for the driver	●	●
Titanium Black, instrument panel Palladium Titanium Black, floor: Pearl Grey	●	●
Towing eye front	●	●
Traffic Sign Recognition	●	●
Two radio folding keys	●	●
Tyre pressure monitoring system	●	●
Warning buzzer and light if driver seat belt is not fastened	●	●
Wash water level indicator	–	●
Wireless App Connect [13)]	●	●
Exterior colours VW		
Ascot grey	●	–
Indium grey metallic [13)]	–	●
Exterior equipment		
Awning light	●	●
Electric entry step	●	●
Exterior stickers Full	●	●
Flush fitting windows	●	●
Flyscreen door	●	●
Midi-Heki 70 x 50 cm above the seating group with flyscreen and blackout blinds	●	●
Mini-Heki 40 x 40 cm above the rear area with flyscreen and blackout blinds	●	●
Sleeping extension on both sides	●	●
Window in the bathroom	●	●
Windows with fly screen and blackout blind in rear doors	●	●
Interior design / living area		
2-burner cooker with sink combination and fixed, surface-mounted tap	●	●
Bench adjustable in inclination	●	●
Centre bathroom with floor-level shower, folding sink and cassette toilet	●	●
Circumferential overhead lockers in the rear	●	●
Closed bathroom overhead cabinet with mirror	●	●

Standard equipment

	600 DR Classic	600 DR Advantage
Clothes rail in the bed area (overhead locker left side)	●	●
Clothes rail on the skylight in the bathroom	●	●
Compressor refrigerator with drawers 90 l incl. freezer compartment (7 l)	●	●
Ergonomically arranged kitchen with generous work surface	●	●
Ergonomically shaped pads for more sitting comfort	●	●
Folding privacy screen in driver's cab: side windows	●	●
Folding privacy screen in driver's cab: windscreen	●	●
Generous storage space and storage options	●	●
Kitchen overhead cupboard incl. open side shelf	●	●
Multifunctional rail on the kitchen back panel (for matching accessories)	●	●
No obstructed view due to well thought-out furniture design	●	●
Open storage space under the roof cabinets, left side of the bed	●	●
Overhead cupboards above the dinette, extending to the front of the cab	●	●
Platform of the seating group with integrated storage compartment	●	●
Pull out bed ladder	●	●
Rear bed with folding disc spring frame	●	●
Rear storage space with 4 integrated lashing eyes	●	●
Rear storage space with a drawer above the gas box	●	●
Shower equipment (pull-out shower head, shower curtain, guide rail, shower holder)	●	●
Storage space in the wall paneling below the table	●	●
Swivelling plate table extension	●	●
Three roomy drawers with Servosoft pull-out	●	●
Upholstery Scandi	●	●
Variably extendable work surface	●	●
Wall / and roof covering in felt look	●	●
Wood décor Amberes Oak	●	●
Heating		
Hot air heating 4 kW with hot water boiler	●	●
Air Conditioning		
Preparation air conditioning in the living room	●	●
Water supply		
Waste water tank insulated and heated	●	●
Water tank 100l, waste water tank 90l	●	●
Gas supply		
Gas shut-off valves easily accessible and centrally located	●	●
Storage space for gas cylinders with 11 kg filling weight each: 2 pcs.	●	●
Electrical installation		
4x 230V sockets, 3x double USB sockets, 1x 12V socket	●	●
Additional dimming function for the standard ambient lighting	●	●
CEE exterior socket for 230 V with circuit breaker	●	●

Standard equipment

	600 DR Classic	600 DR Advantage
Electric charger for body and vehicle battery 12 V / 18 A (trickle charge)	●	●
Indirect lighting	●	●
Installation duct at floor level	●	●
Light switch optimally placed in the vehicle, e.g. directly at the entrance	●	●
Platform of the seating group with indirect lighting with automatic door opening system	●	●
Powerful, maintenance-free battery (95 Ah)	●	●
Pre-wiring solar system	●	●
Rear storage compartment lighting	●	●
SCU (System Control Unit)	●	●
TV preparation 12V and TV socket, SAT connection	●	●
Touch spots under the overhead lockers	●	●
Worktop lighting in the kitchen	●	●
Safety		
10-year leakage guarantee	●	●
Isofix for one seat	●	●

Packages

Advanced Assistance Package (14812)

Advanced Assistance Package: automatic distance control, speed limiter with predictive control, lane departure warning system plus Emergency Assist and traffic jam assistant	
Preparation for "We Connect" and "We Connect Plus	
Additional weight (kg)*	0

Chassis Package (600 DR Classic) (15817)

Exterior mirrors, electrically adjustable and heated	
Light and Visibility Package: "Light Assist" high beam control, daytime running lights with driving light control (automatic), "leaving home" function and manual "Coming home" function, intermittent windscreen wiper control with light and rain sensor	
Discover Media navigation system with 26 cm (10") touch colour display incl. 4 loudspeakers	
Voice assistant (for Discover Media navigation system)	
LED main headlights with LED daytime running lights	
"Air Care Climatronic" cab air conditioning system	
Rear view camera	
Additional weight (kg)*	5.76

Winter Package (14247)

Laminated glass front window in heat protection glazing, heatable	
Seat heating, left and right, separately adjustable	
Heated front windshield washer nozzles and washer fluid level indicator	
Additional weight (kg)*	0.35

○ Optional equipment — Not possible ● Standard equipment ◆ Mandatory △ Not known at the time of publication

CH-P Chassis Package **ASS-P** Assistance Package

*** INFO** The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for optional equipment shown in the model overviews. This is a calculated value for each type and layout that Dethleffs uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and explanations on the subject of weight can be found in the Legal information section. An increase of load capacity increases the manufacturer-specified mass for optional equipment. The increase results from the higher pay-mass due to the alternative chassis. The increased tare weight of the alternative chassis and, in particular, the weight for any mandatory heavier engine variants (e.g. 180 hp) must be deducted from this. For a more detailed description of all mandatory technical dependencies, please refer to the explanations on the footnotes.

CH-P Chassis Package **ASS-P** Assistance Package

*** INFO** The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for optional equipment shown in the model overviews. This is a calculated value for each type and layout that Dethleffs uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and explanations on the subject of weight can be found in the Legal information section. An increase of load capacity increases the manufacturer-specified mass for optional equipment. The increase results from the higher pay-mass due to the alternative chassis. The increased tare weight of the alternative chassis and, in particular, the weight for any mandatory heavier engine variants (e.g. 180 hp) must be deducted from this. For a more detailed description of all mandatory technical dependencies, please refer to the explanations on the footnotes.

Accessory Equipment*

Please note that the prices listed in this category are the recommended retail price of our original accessories. Additional assembly costs may be incurred for the subsequent assembly of the original accessories by your dealer.

	Included in package	Additional weight (kg)*	Code	600 DR Classic	600 DR Advantage
Original Accessories - Exterior					
Alloy wheels set 18"	—	60	3562184	○	○
Awning	—	38.82	3617637	○	○
Mount for Gas Indicator Smart Sensor	—	0.13	3623004	○	○

○ Optional equipment — Not possible ● Standard equipment ◆ Mandatory △ Not known at the time of publication

*** INFO** The items listed in this category are original Dethleffs parts and accessories that are retrofitted to the vehicle after delivery from the factory and not under the responsibility of the manufacturer. Original Dethleffs parts and accessories retrofitted to the vehicle affect the load capacity as well as the mass on the axle. Please note that the technically permissible maximum laden mass of the vehicle as well as the technically permissible maximum laden mass on the axle must not be exceeded even after fitting the original Dethleffs parts and accessories. Detailed information and explanations on the subject of weight can be found in the Legal information section.

Legal notes on weight-related information

The weight specifications and tests for **motorhomes** are uniformly regulated throughout the EU in EU Implementing Regulation No. 2021/535 (until June 2022: EU Implementing Regulation No. 1230/2012). We have summarised and explained the key terms and legal requirements from this **regulation** for you below. Our **dealers** and the Dethleffs configurator on our website offer you additional assistance in configuring your vehicle.

1. Technically permissible maximum laden mass

The **technically permissible maximum laden mass** of the vehicle (e.g. 3,500 kg) is a mass specification set by the manufacturer which the vehicle must not exceed. Information on the **technically permissible maximum laden mass** of the model you have chosen can be found in the technical data. If the vehicle exceeds the **technically permissible maximum laden mass** in everyday driving, this constitutes an administrative offence which may result in a fine.

2. Mass in running order

In simple terms, the **mass in running order** is the basic vehicle with **standard equipment** plus a legally fixed standard weight of 75 kg for the driver. This essentially includes the following items:

- the unladen weight of the vehicle together with the bodywork, including operating fluids such as greases, oils and coolants;
- the **standard equipment**, i.e. all equipment items that are included as standard in the factory-fitted scope of delivery;
- the fresh water tank filled to 100 % in driving mode (driving fill according to manufacturer's specifications;) and an aluminium gas cylinder filled to 100 %;
- the **fuel tank**, which is 90 % full, including fuel;
- the driver, whose weight – regardless of the actual weight – is generally specified as 75 kg in accordance with EU law.

Information on the **mass in running order** can be found for each model in our sales documents. It is important to note that the value for **mass in running order** given in the sales documents is a default value determined in the **type-approval procedure** and verified by the authorities. It is legally permissible and possible for the **mass in running order** of the vehicle delivered to you to deviate from the nominal value stated in the sales documents. The legally permissible **tolerance** is ± 5 %. In this way, the EU legislator accounts for the fact that certain fluctuations in the **mass in running order** occur due to variations in the weight of supplied parts as well as due to processes and weather conditions.

These weight deviations can be illustrated by means of an example calculation:

- **Mass in running order** acc. to sales documents: 2,850 kg
- Legally permissible **tolerance** of ± 5 %: 142.50 kg
- Legally permissible range of **mass in running order**: 2,707.50 kg to 2,992.50 kg

The specific range of permissible weight deviations can be found foreach model in the technical data. Dethleffs makes great efforts to reduce weight variations to the minimum that is unavoidable for production reasons. **Deviations** at the upper and lower end of the range are therefore very rare; however, they cannot be completely ruled out technically, even with all optimisations. The real weight of the vehicle and compliance with the permissible **tolerance** is therefore checked by Dethleffs by weighing each vehicle at the **end of the line**.

3. Mass of the passengers

The **mass of the passengers** is set a standard value of 75 kg for each seat provided by the manufacturer, regardless of the actual weight of the passengers. The **mass of the driver** is already included in the **mass in running order** (see no. 2 above) and is therefore not included again. In the case of a **motorhome** with four **permitted seats**, the **mass of the passengers** is therefore 3 * 75 kg = 225 kg.

4. Optional equipment and actual mass of the vehicle

Optional equipment (also: additional equipment) includes, according to the legal definition, all optional equipment parts not included inthe **standard equipment** which are fitted to the vehicle under the responsibility of the manufacturer – i.e. ex works – and can be ordered by the customer (e.g. awning, bicycle or motorbike carrier, satellite system, solar system, oven, etc.). Information on the individual or package weights of the **optional equipment** that can be ordered can be found in our sales documents. **Optional equipment** in this sense does not include other **accessories** that are retrofitted by the **dealer** or you personally after the vehicle has been delivered ex works.

The **mass of the vehicle in running order** (see no. 2 above) and the mass of the **optional equipment** fitted to a specific vehicle at the factory are together referred to as the **actual mass**. You will find the corresponding information for your vehicle after handover under item 13.2 of the Certificate of Conformity (CoC). Please note that this specification also represents a standardised value. Since the **mass in running order** – as an element of the **actual mass** – is subject to a legally permissible **tolerance** of ± 5 % (see no. 2), the **actual mass** may also deviate accordingly from the stated nominal value.

5. Pay-mass and minimum pay-mass

The installation of optional equipment is also subject to technical and legal limits: Only so much optional equipment can be ordered and fitted at the factory that sufficient free weight remains for baggage and other accessories ("pay-mass") without exceeding the technically permissible maximum laden mass. The pay-mass is calculated by subtracting the mass in running order (nominal value according to sales documents, see no. 2 above), mass of the optional equipment and the mass of the passengers (see no. 3 above) from the technically permissible maximum laden mass (see no. 1 above).
The EU regulations stipulate a fixed minimum pay-mass for motorhomes, which must remain as a minimum for baggage or other non-factory-fitted accessories. This minimum pay-mass is calculated as follows:

Minimum pay-mass in kg ≥ 10 * (n + L)
Where: "n" is the maximum number of passengers plus the driver and "L" is the overall length of the vehicle in metres.
For a motorhome with a length of 6 m and 4 approved seats, the minimum pay-mass is therefore e.g. 10 kg * (4 + 6) = 100 kg.

To ensure that the **minimum pay-mass** is maintained, there is a maximum combination of **optional equipment** that can be ordered for each vehicle model. In the above example with a **minimum pay-mass** of 100 kg, the total mass of **optional equipment** for a vehicle with four **permitted seats** and a **mass in running order** of 2,850 kg should not exceed 325 kg:

	3,500 kg	**technically permissible maximum laden mass**
–	2,850 kg	mass in running order
–	3*75 kg	mass of the passengers
–	100 kg	minimum pay-mass
=	**325 kg**	**maximum permissible mass of optional equipment**

It is important to note that this calculation is based on the default value for **mass in running order** as defined in the **type-approval procedure**, without taking into account the permissible weight deviations for **mass in running order** (see no. 2 above). If the maximum permissible value for the **optional equipment** of (in the example) 325 kg is almost or completely exhausted, an upward weight deviation can therefore result in the **minimum pay-mass** of 100 kg being met mathematically using the default value for the **mass in running order**, although in fact there is no corresponding **load capacity**. Here, too, an example calculation for a vehicle with four seats, whose real weighed **mass in running order** is 2 % above the nominal value:

	3.500 kg	**technically permissible maximum laden mass**
–	2.907 kg	real weighed mass in running order (+ 2 % compared to the stated value of 2,850 kg)
–	3*75 kg	**mass of the passengers**
–	325 kg	**optional equipment** (maximum permissible value)
=	**43 kg**	**actual load capacity (< minimum pay-mass of 100 kg)**

In order to avoid such a situation, Dethleffs further reduces the maximum permissible weight of the total **optional equipment** that can be ordered on a model-specific basis. The limitation of **optional equipment** is intended to ensure that the **minimum pay-mass**, i.e. the legally prescribed free mass for **baggage** and retrofitted **accessories**, is actually available for the **vehicle load capacity** of the vehicles delivered by Dethleffs. Since the weight of a specific vehicle can only be determined when it is weighed at the **end of the line**, in very rare cases a situation may arise in which the **minimum pay-mass** at the **end of the line** is not guaranteed, despite this limitation of **optional equipment**. In order to guarantee the **minimum pay-mass** even in these cases, Dethleffs will check together with your **trade partner** and you before delivery of the vehicle whether, for example, the vehicle is loaded up, seats are reduced or **optional equipment** is removed.

6. Effects of tolerances of the mass in running order on the pay-mass

Regardless of the **minimum pay-mass**, you should note that unavoidable production-related fluctuations in the **mass in running order** – both upwards and downwards – have a mirror-image effect on the remaining **load capacity**: If you order our example vehicle (see no. 3. above), for example, with **optional equipment** with a total weight of 150 kg, the calculated **pay-mass** based on the default value for the **mass in running order** is 275 kg. The **load capacity** actually available may deviate from this value due to **tolerances** and may be higher or lower. If the **mass in running order** of your vehicle is, for example, permissibly 2 % higher than stated in the sales documents, the **load capacity** is reduced from 275 kg to 218 kg:

	3.500 kg	**technically permissible maximum laden mass**
–	2.907 kg	real weighed mass in **running order** (+ 2 % compared to the stated value of 2,850 kg)
–	3*75 kg	**mass of the passengers**
–	150 kg	**optional equipment** ordered for the specific vehicle
=	**218 kg**	**sactual load capacity**

As a precaution to ensure that the calculated **pay-mass** is actually given, you should therefore take the possible and permissible **tolerances** for the **mass in running order** into account when configuring your vehicle. We also recommend that you weigh the laden **motorhome** on a non-automatic scale before each journey and, taking the individual weight of the **passengers** into account, determine whether the **technically permissible maximum laden mass** and the **technically permissible maximum mass on the axle** are observed.

TECHNICAL INFORMATION / FOOTNOTES

If you order your vehicle with additional equipment, you should check whether it makes sense or is necessary to increase the vehicle's weight! The optional equipment partially replaces the standard equipment.

Footnotes

1) When selecting a Maxi chassis, the towing capacity changes to 3,000 kg. When selecting a chassis with a gross vehicle weight of 4.25 t, the towing capacity changes to 2,250 kg.
2) Individual option already included in the Active Plus Package.
3) If maxi chassis or automatic transmission is selected, black matt wheels are replaced by bicolor wheels.
4) Two-tone rims only available in combination with maxi chassis or automatic transmission
5) With the 600 ER, it is not possible to use two child seats side by side at the same time.
6) Full LED headlights (individual option) only available in combination with the 95 Years package
7) Front with panoramic window (6432) and pop-up roof (10306) cannot be combined
8) Scandi upholstery (13167) only available in combination with wood décor Amberes Oak (11827)
9) Innovative pull-out under the rear bed (13609) replaces storage shelf under the rear bed (standard)
10) CP-Plus (6622) is already included in an option with electric heating.
11) For 5.40-metre campervans: Not in combination with pop-up roof (10306)
12) 95 years package not possible in combination with other packages.
13) Already included in the Advantage Edition of Performance
14) Diesel heater and parking heater cannot be combined
15) If the roof air conditioning system is ordered, the standard roof bonnet in the rear is omitted

General Information

The information on the scope of delivery, appearance, performance, dimensions and weights of the vehicles corresponds to the knowledge available at the time of going to press and to the European homologation regulations.

Technical changes in design and equipment as well as errors excepted. These Technical Information is valid from August 1st, 2026. Vehicle illustrations in this document may contain optional equipment subject to an extra charge. We expressly reserve the right to make changes. With the publication of this Technical Information, all previous technical documents lose their validity.
