Important Information for the selection of your motorhomes

When buying a motorhome, camper van or urban vehicle (hereafter: motorhome), it is particularly important to choose the right layout and an appealing design. In addition, weight also plays an essential role. Family, friends, optional equipment, accessories and baggage – space must be available for all of these. At the same time, there are legal and technical limits to the configuration and load. Every motorhome is designed for a certain weight, which may not be exceeded during driving.

For motorhome buyers, this raises the question: How should I configure my vehicle to accommodate passengers, baggage and accessories according to my needs without the vehicle exceeding this maximum weight? In order to make this decision easier for you, we provide you below with a few tips that are particularly important when selecting your vehicle from our portfolio:

1 The technically permissible maximum laden mass ...
... is a value set by the manufacturer which the vehicle may not exceed. Dethleffs specifies a layout-related upper limit for the vehicle, which can vary from layout to layout (e.g. 3.500 kg, 4.400 kg). You can find the corresponding specification for each layout in the technical data.

Technical info		Model 1	Model 2
Standard chassis		Fiat Ducato	Fiat Ducato
Emission standards		Euro 6d Final	Euro 6d Final
1 Technically permissible maximum laden mass	kg	3499	3499
2 Mass in running order	kg	2.890 (2.746 - 3.035)*	2.982 (2.833 - 3.131)*
Permitted number of seats (including driver)		4	4
Manufacturer-specified mass for optional equipment	kg	245	149

2 The mass in running order ...
... consists – to put it simply – of the basic vehicle with standard equipment plus a standard weight of 75 kg for the driver. It is legally permissible and possible for the mass in running order of your vehicle to deviate from the nominal value stated in the sales documents. The permissible tolerance is ± 5 %. The permissible range in kilograms is given in brackets after the mass in running order. In order to provide you with full transparency regarding possible weight deviations, Dethleffs weighs each vehicle at the end of the line and informs your trade partner of your vehicle's weighing result for forwarding to you. **Detailed explanations on the subject of mass in running order can be found in the "Legal Information" section.**

3 The permitted number of seats (including driver) ...
... is determined by the manufacturer in what is referred to as the type-approval procedure. This results in what is referred to as the mass of the passengers. For this, a standard weight of 75 kg per passenger (without driver) is calculated. **Detailed explanations on the subject of mass of the passengers can be found in the "Legal Information" section.**

Technical info		Model 1	Model 2
Standard chassis		Fiat Ducato	Fiat Ducato
Emission standards		Euro 6d Final	Euro 6d Final
Technically permissible maximum laden mass	kg	3499	3499
Mass in running order	kg	2.890 (2.746 - 3.035)*	2.982 (2.833 - 3.131)*
3 Permitted number of seats (including driver)		4	4
4 Manufacturer-specified mass for optional equipment	kg	245	149

4 The manufacturer-specified mass for optional equipment ...
... is a value set by Dethleffs per layout for the maximum mass of optional equipment that can be ordered. This limit is intended to ensure that the minimum pay-mass, i.e. the legally prescribed free mass for baggage and retrofitted accessories, is actually available for the vehicle load capacity of the vehicles delivered by Dethleffs. If, in exceptional cases, the weighing at the end of the line nevertheless shows that the actual load capacity falls short of the minimum pay-mass due to a permissible weight deviation, we will check together with your trade partner and you whether we should, for example, increase the load capacity of the vehicle, reduce the number of seats or remove optional equipment before delivering the vehicle. Detailed explanations on the subject of the effects of the tolerances on the minimum pay-mass and the payload can be found in the "Legal Information" section.

Optional equipment*	Included in package	Price €	Additional weight (kg)*	Code	Model 1	Model 2
Bathroom						
Shower grid	—	399,-	9	1385	—	○
Additional window in bathroom	—	269,-	5	9845	○	○
Multimedia						
Automatic HD satellite system 65 Twin	—	549,-	15	713	○	—
Dethleffs Naviceiver incl. DAB+, truck navigation and connection to on-board control panel		238,-	1,5	1657	○	●

5

5 The additional weight of optional equipment and packages ...
... increases the actual mass of the vehicle (= mass in running order plus selected optional equipment) and reduces the pay-mass. The specified value shows the additional weight compared to the standard equipment of the respective layout. The total weight of the selected packages and optional equipment must not exceed the manufacturer-specified mass for optional equipment.

Just Van Low Profile

At just 220 cm wide and starting at 599 cm long, the brand-new Just Van combines the agility of a camper van with the roominess of a classic motorhome. Perfect for anyone who values the freedom to roam without compromising on comfort. Thanks to its excellent insulation and practical winter options, the Just Van is a reliable travel companion whatever the season. A compressor fridge and diesel heating give you everything you need for off-grid travel, while the generous standard specification makes every adventure that little bit better.

Upholstery

Upholstery Caroni

Upholstery Jupiter incl. driver and passenger seat covers
○

Wood décor

Wood décor Noce Nagano

○ optionally available

Plus factors

- Compact van dimensions (2.20 m wide, 2.69 m high) for agile, safe handling
- Lifetime body concept: side walls, roof and underbody made of GRP
- 7-zone cold foam mattresses on ergonomic slatted bases
- 3.5 tonnes gross weight: high payload, approved for 4 people
- Driver assistance systems, including rain and light sensors with automatic headlight dimming and a tyre pressure monitoring system
- Head unit with Apple CarPlay/Android Auto and a rear view camera
- 6 kW diesel heater with a 10-litre hot water boiler
- Privacy black-flush-fitting window, infinitely adjustable

○ Optional equipment — Not possible ● Standard equipment ◆ Mandatory △ Not known at the time of publication

*** INFO** The specified mass in running order is a default value defined in the type-approval procedure. Due to manufacturing tolerances, the actual weighed mass in running order may deviate from the value stated above. Deviations of up to ± 5 % of the mass in running order are legally permissible and possible. The permissible range in kilograms is given in brackets after the mass in running order. The manufacturer-specified mass for optional equipment is a calculated value for each type and layout that Dethleffs uses to determine the maximum weight available for factory-fitted optional equipment. The limitation of optional equipment is intended to ensure that the minimum pay-mass, i.e. the legally prescribed free mass for baggage and retrofitted accessories, is actually available for the vehicle load capacity of the vehicles delivered by Dethleffs. The real weight of your vehicle ex works can only be determined when it is weighed at the end of the line. If, in exceptional cases, the weighing shows that the actual load capacity falls below theminimum pay-mass despite limiting the optional equipment due to a permissible weight deviation, we will check together with your trade partner and you whether we should, for example, increase the load capacity of the vehicle, reduce the number of seats or remove optional equipment before delivering the vehicle. The technically permissible maximum laden mass of the vehicle and the technically permissible maximum mass on the axle must not be exceeded. Detailed information & explanations on the subject of weight and the configuration of the vehicle can be found in the section Legal information. For a more detailed description of all mandatory technical dependencies, please refer to the explanations on the footnotes.

Furniture layouts			
Cosy lounge seating group with free-standing, rigid table base	–	–	●
Double bed high in the rear, transverse	●	–	–
Fixed beds with ergonomic wooden slatted frames and 110 mm thick 7-zone premium mattresses made from climate-regulating material	●	●	●
High-level single beds incl. comfortable access via steps	–	●	●
Isofix child seat attachment for 3rd and 4th seats in the direction of travel	●	●	–
Modern entrance module with practical entry handle, 'D' coat hook and practical textile bag, including preparation for TV mount	–	–	●
Option to convert single bed to double bed	–	●	●
Overhead locker doors with soft-close function	●	●	●
Overhead lockers in the rear area	●	–	–
Practical textile bag with preparation for TV mount	●	●	–
Roof cabinets in the rear with one bracket on each side for textile roof cabinet bags (available via Original Accessories)	–	●	●
Seating group with harness bench incl. two 3-point harnesses and hook-in and extendable table	●	●	–
Window panelling in the living room	●	●	●
Kitchen			
Gourmet kitchen: 2-burner stove, spacious drawers, cutlery tray, waste bin and generous work surface	●	●	●
Kitchen backsplash	●	●	●
MultiFlex rail system incl. hooks (further accessories via Dethleffs Original Accessories)	●	●	●
Room-high compressor refrigerator with separate freezer compartment (131 l)	●	●	●
Worktop extension, fold-away	●	●	●

Standard equipment

	T1	T4	T5
Bathroom			
Equipped with cabinets, storage compartments, large mirrors, toothbrush mug and toilet paper holder	●	●	–
Shower grate	●	●	●
Swiveling bathroom wall for optimal use of space	–	–	●
Toilet room with practical swivelling wall incl. shower fitting and large washbasin	●	●	–
Multimedia			
Dethleffs Naviceiver incl. DAB+, truck navigation, wireless Apple CarPlay and Android Auto	●	●	●
Flat-screen TV bracket	●	●	●
Integrated single-lens rear view camera	●	●	●
Pre-wiring for satellite system	●	●	●
Heating			
4 kW diesel hot air heating with hot water boiler and integrated height kit	●	●	●
Heating in the seating unit for optimum heat distribution, built-in	●	●	●
Air Conditioning			
Pre-wiring for roof A/C	●	●	●
Electrical installation			
Automatic switch-on/disconnect for starter battery, leisure battery and refrigerator	●	●	●
Awning light 12 V	●	●	●
EBL with separate FI protection switch	●	●	●
Functional lighting (surface-mounted and recessed spotlights)	●	●	●
LED lighting throughout the vehicle	●	●	●
Leisure battery AGM, 95 Ah	●	●	●
Light Moments: Illuminated window panelling in the living room	●	●	●
Light Moments: Indirect ambient lighting above the overhead lockers	●	●	●
Light Moments: illuminated kitchen splashback	●	●	●
Number of sockets: 1x 12V, 5x 230V, 4x USB	●	●	●
On-board control panel	●	●	●
Pre-wiring for solar	●	●	●
Water supply			
Fresh water tank in insulated and heated area	●	●	●
Submersible pump	●	●	●
Gas supply			
Storage space for a gas cylinder with a filling weight of 2.75 kg	●	●	●
Safety			
Smoke detector	●	●	●

*** INFO** The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for optional equipment shown in the model overviews. This is a calculated value for each type and layout that Dethleffs uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and explanations on the subject of weight can be found in the Legal information section.

Optional equipment*

	Included in package	Additional weight (kg)*	Code	T 1	T 4	T 5

WI-KO Winter Comfort Package

*** INFO** The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for optional equipment shown in the model overviews. This is a calculated value for each type and layout that Dethleffs uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and explanations on the subject of weight can be found in the Legal information section. An increase of load capacity increases the manufacturer-specified mass for optional equipment. The increase results from the higher pay-mass due to the alternative chassis. The increased tare weight of the alternative chassis and, in particular, the weight for any mandatory heavier engine variants (e.g. 180 hp) must be deducted from this. For a more detailed description of all mandatory technical dependencies, please refer to the explanations on the footnotes.

*** INFO** The items listed in this category are original Dethleffs parts and accessories that are retrofitted to the vehicle after delivery from the factory and not under the responsibility of the manufacturer. Original Dethleffs parts and accessories retrofitted to the vehicle affect the load capacity as well as the mass on the axle. Please note that the technically permissible maximum laden mass of the vehicle as well as the technically permissible maximum laden mass on the axle must not be exceeded even after fitting the original Dethleffs parts and accessories. Detailed information and explanations on the subject of weight can be found in the Legal information section.

Accessory Equipment*

Please note that the prices listed in this category are the recommended retail price of our original accessories. Additional assembly costs may be incurred for the subsequent assembly of the original accessories by your dealer.

○ Optional equipment — Not possible ● Standard equipment ◆ Mandatory △ Not known at the time of publication

*** INFO** The items listed in this category are original Dethleffs parts and accessories that are retrofitted to the vehicle after delivery from the factory and not under the responsibility of the manufacturer. Original Dethleffs parts and accessories retrofitted to the vehicle affect the load capacity as well as the mass on the axle. Please note that the technically permissible maximum laden mass of the vehicle as well as the technically permissible maximum laden mass on the axle must not be exceeded even after fitting the original Dethleffs parts and accessories. Detailed information and explanations on the subject of weight can be found in the Legal information section.

Globebus Active I

Dethleffs' most compact range of integrated motorhomes drives as easily and dynamically as a van! Ideal for city breaks and mountain roads. Yet despite its compact size, it impresses with all the benefits of a full-size motorhome, such as insulation, freedom of movement, and kitchen and bathroom facilities. For anyone who values striking, sporty details, the Gran Turismo equipment package is just the thing.

○ optionally available

Plus factors

- Proven Dethleffs quality at an attractive price
- Extensive standard chassis equipment including 16-inch alloy wheels, a 90-litre fuel tank and a leather-trimmed steering wheel with controls, driver assistance systems and a tyre pressure monitoring system
- Agile and safe handling due to compact exterior dimensions with an external width of only 2.20 m
- Sporty, striking Gran Turismo (GT) equipment package (optional)
- Moniceiver with Apple CarPlay/Android Auto and a rear view camera; radio system preparation including a sound package in the cab; DAB+ roof antenna
- Fully equipped kitchen with 2-burner stove, trash can, multiflex rail system and much more.
- Pleasant sleeping comfort due to 150 mm thick 7-zone cold foam mattresses made of climate-regulating material and ergonomic wooden slatted frames
- Centrally positioned heating for optimum heat distribution
- Tensioning nets in the rear - clever storage space under the overhead locker
- Privacy Black flush-fitting window, infinitely adjustable
- 10-year tightness guarantee!

○ Optional equipment — Not possible ● Standard equipment ◆ Mandatory △ Not known at the time of publication

*** INFO** The specified mass in running order is a default value defined in the type-approval procedure. Due to manufacturing tolerances, the actual weighed mass in running order may deviate from the value stated above. Deviations of up to ± 5 % of the mass in running order are legally permissible and possible. The permissible range in kilograms is given in brackets after the mass in running order. The manufacturer-specified mass for optional equipment is a calculated value for each type and layout that Dethleffs uses to determine the maximum weight available for factory-fitted optional equipment. The limitation of optional equipment is intended to ensure that the minimum pay-mass, i.e. the legally prescribed free mass for baggage and retrofitted accessories, is actually available for the vehicle load capacity of the vehicles delivered by Dethleffs. The real weight of your vehicle ex works can only be determined when it is weighed at the end of the line. If, in exceptional cases, the weighing shows that the actual load capacity falls below theminimum pay-mass despite limiting the optional equipment due to a permissible weight deviation, we will check together with your trade partner and you whether we should, for example, increase the load capacity of the vehicle, reduce the number of seats or remove optional equipment before delivering the vehicle. The technically permissible maximum laden mass of the vehicle and the technically permissible maximum mass on the axle must not be exceeded. Detailed information & explanations on the subject of weight and the configuration of the vehicle can be found in the section Legal information. For a more detailed description of all mandatory technical dependencies, please refer to the explanations on the footnotes.

WI-KO Winter Comfort Package

*** INFO** The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for optional equipment shown in the model overviews. This is a calculated value for each type and layout that Dethleffs uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and explanations on the subject of weight can be found in the Legal information section. An increase of load capacity increases the manufacturer-specified mass for optional equipment. The increase results from the higher pay-mass due to the alternative chassis. The increased tare weight of the alternative chassis and, in particular, the weight for any mandatory heavier engine variants (e.g. 180 hp) must be deducted from this. For a more detailed description of all mandatory technical dependencies, please refer to the explanations on the footnotes.

Globebus Performance Low Profile		T 16	T 46
Standard chassis		VW Crafter - FWD	VW Crafter - FWD
Standard engine		2,0 l TDI	2,0 l TDI
kW (bhp)		103 (140)	103 (140)
Emission standards		Euro VI-E	Euro VI-E
Overall length, approx.	cm	625	685
Overall width, approx.	cm	220	220
Overall height, approx.	cm	288 [1)]	288 [1)]
Headroom in living area, approx.	cm	190	190
Towable load braked/unbraked	kg	2500 / 750	2500 / 750
Wheelbase, approx.	mm	3640	3640
Bed dimension: Central / middle bed, L x W, approx.	cm	163 x 94 - 76	163 x 94 - 76
Bed dimension: Rear bed, L x W, approx.	cm	198 x 142 - 130	202 x 80 / 192 x 75 / 198 x 160
Sleeping berths standard / max.		3	3
Mass in running order (+/-5%)*	kg	2879 (2735 to 3023)*	3038 (2886 to 3190)*
Manufacturer-specified mass for optional equipment*	kg	289	504
Technically permissible maximum laden mass*	kg	3500	3880
Permitted number of seats (including driver)*		4	4
Refrigerator volume (thereof freezer), approx.	l	83 (10)	131 (15)
Waste water tank, approx.	l	90	90
Fresh water tank capacity, total/ Fresh water tank capacity at driving filling	l	115 / 20	115 / 20
Measurement storage opening right (W x H)	cm	50 x 85	65 x 105
Measurement storage opening left (W x H)	cm	50 x 85	65 x 105

○ Optional equipment — Not possible ● Standard equipment ◆ Mandatory △ Not known at the time of publication

*** INFO** The specified mass in running order is a default value defined in the type-approval procedure. Due to manufacturing tolerances, the actual weighed mass in running order may deviate from the value stated above. Deviations of up to ± 5 % of the mass in running order are legally permissible and possible. The permissible range in kilograms is given in brackets after the mass in running order. The manufacturer-specified mass for optional equipment is a calculated value for each type and layout that Dethleffs uses to determine the maximum weight available for factory-fitted optional equipment. The limitation of optional equipment is intended to ensure that the minimum pay-mass, i.e. the legally prescribed free mass for baggage and retrofitted accessories, is actually available for the vehicle load capacity of the vehicles delivered by Dethleffs. The real weight of your vehicle ex works can only be determined when it is weighed at the end of the line. If, in exceptional cases, the weighing shows that the actual load capacity falls below theminimum pay-mass despite limiting the optional equipment due to a permissible weight deviation, we will check together with your trade partner and you whether we should, for example, increase the load capacity of the vehicle, reduce the number of seats or remove optional equipment before delivering the vehicle. The technically permissible maximum laden mass of the vehicle and the technically permissible maximum mass on the axle must not be exceeded. Detailed information & explanations on the subject of weight and the configuration of the vehicle can be found in the section Legal information. For a more detailed description of all mandatory technical dependencies, please refer to the explanations on the footnotes.

Standard equipment

	T 16	T 46
Volkswagen chassis		
Steel wheels, black, 235/65 R16 C	●	●
VW Crafter chassis, 2.0 l TDI (103 kW / 140 hp) heavy duty, front-wheel drive, 6-speed manual transmission	●	●

Packages

Chassis Package RHD (15418)

Manual air conditioning	
Discover Media navigation system with 10’ touch colour display	
Preparation for VW Connect and VW Connect Plus	
LED main headlights with LED daytime running lights	
Light and view package	
Electrically adjustable and heated exterior mirrors with integrated indicators	
Additional weight (kg)*	4.73

Assistance Package (14916)

Advanced Assistance Package incl. automatic distance control (ACC), intelligent speed/travel/lane assist	
Additional weight (kg)*	0

Winter comfort package Diesel hot air Globebus Performance (14938)

Diesel hot air heating 6 kW with 1.8 kW electric heating element incl. digital control element and integrated height kit	
XPS insulation	
Waste water tank and pipes electrically heated	
Insulated waste water tank	
Insulated under-floor pipes	
Switch for water pump	
Additional weight (kg)*	23.8

△Not known at the time of publication

*** INFO** The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for optional equipment shown in the model overviews. This is a calculated value for each type and layout that Dethleffs uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and explanations on the subject of weight can be found in the Legal information section.

WI-KO Winter Comfort Package

*** INFO** The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for optional equipment shown in the model overviews. This is a calculated value for each type and layout that Dethleffs uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and explanations on the subject of weight can be found in the Legal information section. An increase of load capacity increases the manufacturer-specified mass for optional equipment. The increase results from the higher pay-mass due to the alternative chassis. The increased tare weight of the alternative chassis and, in particular, the weight for any mandatory heavier engine variants (e.g. 180 hp) must be deducted from this. For a more detailed description of all mandatory technical dependencies, please refer to the explanations on the footnotes.

Optional equipment*

Access to the habitation with comfortable coupe entry and wide, electric step	●	●
Bedroom windows right and left with blackout & mosquito screen	●	●
Dethleffs exclusive rear light carrier with ShapeLine LED rear lights and black aprons, and 3rd brake light integrated into rear spoiler	●	●
Double-glazed flush-fitting windows with blackout & mosquito protection, steplessly adjustable	●	●
EPS insulation	●	●
FirstEdition exterior design (bi-colour paint T-hood, black edge strips)	●	●
Floor thickness: 48 mm, side wall thickness: 34 mm and roof thickness: 35 mm	●	●
Flyscreen habitation door	●	●
GRP roof	●	●
Habitation door with window incl. blackout and central locking (incl. cab door)	●	●
Lifetime Smart construction technology: rot-free floor construction with no wood inserts, with GRP cladding on the underslung and roof	●	●
Opening window in T-hood	●	●
Panorama skylight 70 x 50 cm in the living area	●	●
Rear garage: two garage door/hatches with one-hand operation, rear lowering (150 kg surface load), heated, with lashing rails, illuminated, 1 x 230 V socket	–	●
Rear garage: two garage doors/flaps with one-hand operation, 150 kg surface load, heated, with lashing strips, illuminated, 1 x 230 V socket	●	–
Side panels and rear panel made of resistant high-gloss GRP with smooth, shiny surface	●	●
Skylight 40 x 40 cm above rear bed	●	●
Exterior design		
Exterior paint finish habitation Grey	●	●
Interior design		
Upholstery Saros	●	●
Wood décor Ashton	●	●
Furniture layouts		
AirPlus overhead locker rear ventilation to avoid condensation	●	●
Double bed high in the rear, transverse	●	–
High-level single beds incl. comfortable access via steps	–	●
Makeshift bed	●	●
Option to convert single beds to double bed	–	●

Standard equipment

	T 16 4x4	T 46 4x4
Overhead locker doors with soft-close function	●	●
Rear beds with ergonomic wooden slatted frames and 110 mm thick 7-zone premium mattresses made from climate-regulating material	●	–
Rear beds with ergonomic wooden slatted frames and 150 mm thick 7-zone premium mattresses made of climate-regulating material	–	●
Seating area with belted bench seat including two 3-point belts with ISOFIX and attachable table with swing-out extension	●	●
Two practical tension nets under the overhead locker in the rear bed	–	●
Window panelling in the living room	●	●
Kitchen		
Compressor refrigerator with freezer compartment (83 l)	●	–
Gourmet kitchen: 2-burner stove, spacious drawers, cutlery tray, waste bin and generous work surface	●	●
Kitchen backsplash	●	●
MultiFlex rail system incl. hooks (further accessories via Dethleffs Original Accessories)	●	●
Room-high compressor refrigerator with separate freezer compartment (131 l)	–	●
Bathroom		
Equipped with cabinets, storage compartments, large mirrors, toothbrush mug and toilet paper holder	●	●
Shower grate	●	●
Toilet room with practical swivelling wall incl. shower fitting and large washbasin	●	●
Multimedia		
Flat-screen TV bracket	●	●
Heating		
Diesel hot air heating 6 kW with hot water boiler and integrated height kit	●	●
Digital control element for hot air heating	●	●
Heating in the seating unit for optimum heat distribution, built-in	●	●
Electrical installation		
150Ah lithium (LiFePo4) habitation battery incl. 45 A charge booster	●	●
45 A charging booster	●	●
Automatic switch-on/disconnect for starter battery, leisure battery and refrigerator	●	●
Dethleffs connect - System Control Unit Lite	●	●
EBL with separate FI protection switch	●	●
Light Moments: Clad seat chest side with indirect lighting	●	●
Light Moments: Illuminated window panelling in the living room	●	●
Light Moments: Indirect ambient lighting above the overhead lockers	●	●
Light Moments: Indirect wall surface ambient lighting	●	●
Light Moments: illuminated kitchen splashback	●	●
Premium on-board control panel with touchscreen	●	●
Water supply		
Fresh water tank in insulated and heated area	●	●
Insulated waste water tank	●	●
Submersible pump	●	●
Gas supply		

Standard equipment

	T 16 4x4	T 46 4x4
Storage space for a gas cylinder with a filling weight of 2.75 kg	●	●
Safety		
Smoke detector	●	●

Packages

Chassis Package RHD (15418)

Manual air conditioning	
Discover Media navigation system with 10’ touch colour display	
Preparation for VW Connect and VW Connect Plus	
LED main headlights with LED daytime running lights	
Light and view package	
Electrically adjustable and heated exterior mirrors with integrated indicators	
Additional weight (kg)*	4.73

Assistance Package (14916)

Advanced Assistance Package incl. automatic distance control (ACC), intelligent speed/travel/lane assist	
Additional weight (kg)*	0

Winter comfort package Diesel hot air Globebus Performance (15820)

Diesel hot air heating 6 kW with 1.8 kW electric heating element incl. digital control element and integrated height kit	
XPS insulation	
Waste water tank and pipes electrically heated	
Insulated under-floor pipes	
Switch for water pump	
Additional weight (kg)*	15.3

△Not known at the time of publication

*** INFO** The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for optional equipment shown in the model overviews. This is a calculated value for each type and layout that Dethleffs uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and explanations on the subject of weight can be found in the Legal information section.

Optional equipment*

	Included in package	Additional weight (kg)*	Code	T 16 4x4	T 46 4x4

WI-KO Winter Comfort Package

*** INFO** The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for optional equipment shown in the model overviews. This is a calculated value for each type and layout that Dethleffs uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and explanations on the subject of weight can be found in the Legal information section. An increase of load capacity increases the manufacturer-specified mass for optional equipment. The increase results from the higher pay-mass due to the alternative chassis. The increased tare weight of the alternative chassis and, in particular, the weight for any mandatory heavier engine variants (e.g. 180 hp) must be deducted from this. For a more detailed description of all mandatory technical dependencies, please refer to the explanations on the footnotes.

Optional equipment*

Just Camp Active Low Profile

Some decisions are easy. Such as whether to buy the Just Camp! With its trendy design, practical equipment and many fresh ideas, your first step into the world of motorhomes has never been easier. And with seven different layouts to choose from, you're certain to find one that meets your personal camping requirements.

Upholstery

Upholstery Heron (partial textile-leather)

Upholstery Pluto (partial textile-leather) ○

Wood décor

Wood décor Noce Nagano

○ optionally available

Plus factors

- Proven Lifetime body construction with GRP outer skin and excellent insulation
- 70 cm wide habitation door with central locking
- Interior height 2.13 m (not below pull-down bed)
- Pleasant sleeping comfort due to 150 mm thick 7-zone cold foam mattresses made of climate-regulating material and ergonomic wooden slatted frames
- Privacy Black flush-fitting window, infinitely adjustable
- Head unit with Apple CarPlay/Android Auto and a rear view camera
- Chassis with driver assistance features: rain/light sensor, automatic headlight dimming, tyre pressure monitoring system
- Modern entrance module with a door handle and storage compartments
- All layouts come as attractive ACTIVE model
- 10-year tightness guarantee!

○ Optional equipment — Not possible ● Standard equipment ◆ Mandatory △ Not known at the time of publication

*** INFO** The specified mass in running order is a default value defined in the type-approval procedure. Due to manufacturing tolerances, the actual weighed mass in running order may deviate from the value stated above. Deviations of up to ± 5 % of the mass in running order are legally permissible and possible. The permissible range in kilograms is given in brackets after the mass in running order. The manufacturer-specified mass for optional equipment is a calculated value for each type and layout that Dethleffs uses to determine the maximum weight available for factory-fitted optional equipment. The limitation of optional equipment is intended to ensure that the minimum pay-mass, i.e. the legally prescribed free mass for baggage and retrofitted accessories, is actually available for the vehicle load capacity of the vehicles delivered by Dethleffs. The real weight of your vehicle ex works can only be determined when it is weighed at the end of the line. If, in exceptional cases, the weighing shows that the actual load capacity falls below theminimum pay-mass despite limiting the optional equipment due to a permissible weight deviation, we will check together with your trade partner and you whether we should, for example, increase the load capacity of the vehicle, reduce the number of seats or remove optional equipment before delivering the vehicle. The technically permissible maximum laden mass of the vehicle and the technically permissible maximum mass on the axle must not be exceeded. Detailed information & explanations on the subject of weight and the configuration of the vehicle can be found in the section Legal information. For a more detailed description of all mandatory technical dependencies, please refer to the explanations on the footnotes.

*** INFO** The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for optional equipment shown in the model overviews. This is a calculated value for each type and layout that Dethleffs uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and explanations on the subject of weight can be found in the Legal information section.

WI-KO Winter Comfort Package

*** INFO** The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for optional equipment shown in the model overviews. This is a calculated value for each type and layout that Dethleffs uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and explanations on the subject of weight can be found in the Legal information section. An increase of load capacity increases the manufacturer-specified mass for optional equipment. The increase results from the higher pay-mass due to the alternative chassis. The increased tare weight of the alternative chassis and, in particular, the weight for any mandatory heavier engine variants (e.g. 180 hp) must be deducted from this. For a more detailed description of all mandatory technical dependencies, please refer to the explanations on the footnotes.

Trend Active Low Profile

With its modern design, extensive standard specification and clever new functions, the Trend is the undisputed winner when it comes to value for money. A standout comfort feature is the level IsoProtect living room floor, running seamlessly from the cab to the bathroom. As a low-profile model, the Trend comes as standard with an opening window in the cab hood, creating a bright and airy interior.

Upholstery

Upholstery Heron (partial textile-leather)

Upholstery Pluto (partial textile-leather) ○

Wood décor

Wood décor Ashton

○ optionally available

Plus factors

- Lifetime Smart superstructure - with wood-free, GRP-clad underbody
- Large moniceiver with Apple CarPlay/Android Auto and a rear view camera, including preparation for a radio system, a sound package in the cab and a DAB+ radio antenna mounted on the roof
- Aerodynamic T-hood with pop-up window as standard
- Exclusive rear design with top-entry rear wall, ShapeLine LED tail lights and 3rd brake light integrated into the rear spoiler
- Large rear garage can be loaded on both sides, one-hand operation of the garage doors, lighting, 230 V socket and sturdy lashing rails
- 70 cm wide habitation door with convenient coupe entrance
- Level Iso-Protect comfort flooring in the living area without landings or steps
- New overhead locker concept with handleless fronts and large storage volume incl. AirPlus overhead locker rear ventilation
- Sleeping area: Outstanding sleeping comfort with 150 mm thick Evopore cold foam mattresses
- Modern entrance shelf with practical access handle, storage compartments and tensioning straps
- Privacy Black flush-fitting window, infinitely adjustable
- 10-year tightness guarantee!

*** INFO** The specified mass in running order is a default value defined in the type-approval procedure. Due to manufacturing tolerances, the actual weighed mass in running order may deviate from the value stated above. Deviations of up to ± 5 % of the mass in running order are legally permissible and possible. The permissible range in kilograms is given in brackets after the mass in running order. The manufacturer-specified mass for optional equipment is a calculated value for each type and layout that Dethleffs uses to determine the maximum weight available for factory-fitted optional equipment. The limitation of optional equipment is intended to ensure that the minimum pay-mass, i.e. the legally prescribed free mass for baggage and retrofitted accessories, is actually available for the vehicle load capacity of the vehicles delivered by Dethleffs. The real weight of your vehicle ex works can only be determined when it is weighed at the end of the line. If, in exceptional cases, the weighing shows that the actual load capacity falls below theminimum pay-mass despite limiting the optional equipment due to a permissible weight deviation, we will check together with your trade partner and you whether we should, for example, increase the load capacity of the vehicle, reduce the number of seats or remove optional equipment before delivering the vehicle. The technically permissible maximum laden mass of the vehicle and the technically permissible maximum mass on the axle must not be exceeded. Detailed information & explanations on the subject of weight and the configuration of the vehicle can be found in the section Legal information. For a more detailed description of all mandatory technical dependencies, please refer to the explanations on the footnotes.

*** INFO** The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for optional equipment shown in the model overviews. This is a calculated value for each type and layout that Dethleffs uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and explanations on the subject of weight can be found in the Legal information section.

WI-KO Winter Comfort Package

*** INFO** The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for optional equipment shown in the model overviews. This is a calculated value for each type and layout that Dethleffs uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and explanations on the subject of weight can be found in the Legal information section. An increase of load capacity increases the manufacturer-specified mass for optional equipment. The increase results from the higher pay-mass due to the alternative chassis. The increased tare weight of the alternative chassis and, in particular, the weight for any mandatory heavier engine variants (e.g. 180 hp) must be deducted from this. For a more detailed description of all mandatory technical dependencies, please refer to the explanations on the footnotes.

*** INFO** The items listed in this category are original Dethleffs parts and accessories that are retrofitted to the vehicle after delivery from the factory and not under the responsibility of the manufacturer. Original Dethleffs parts and accessories retrofitted to the vehicle affect the load capacity as well as the mass on the axle. Please note that the technically permissible maximum laden mass of the vehicle as well as the technically permissible maximum laden mass on the axle must not be exceeded even after fitting the original Dethleffs parts and accessories. Detailed information and explanations on the subject of weight can be found in the Legal information section.

Trend Active A Class

With its modern design, extensive standard specification and clever new functions, the Trend is the undisputed winner when it comes to value for money. A standout comfort feature is the level IsoProtect living room floor, running seamlessly from the cab to the bathroom. And in the Trend A Class, a large pull-down bed above the cab comes as standard – providing two comfy berths that take up no space during the day.

Upholstery

Upholstery Heron (partial textile-leather)

Upholstery Pluto (partial textile-leather) ○

Wood décor

Wood décor Ashton

○ optionally available

Plus factors

- Lifetime Smart superstructure - with wood-free, GRP-clad underbody
- Exclusive rear design with top-entry rear wall, ShapeLine LED tail lights and 3rd brake light integrated into the rear spoiler
- Large moniceiver with Apple CarPlay/Android Auto and a rear view camera, including preparation for a radio system, a sound package in the cab and a DAB+ radio antenna mounted on the roof
- Large rear garage can be loaded on both sides, one-hand operation of the garage doors, lighting, 230 V socket and sturdy lashing rails
- 70 cm wide habitation door with convenient coupe entrance
- Level Iso-Protect comfort flooring in the living area without landings or steps
- New overhead locker concept with handleless fronts and large storage volume incl. AirPlus overhead locker rear ventilation
- Pull-down bed in the cab as standard
- Sleeping area: Outstanding sleeping comfort with 150 mm thick Evopore cold foam mattresses
- Privacy Black flush-fitting window, infinitely adjustable
- 10-year tightness guarantee!

*** INFO** The specified mass in running order is a default value defined in the type-approval procedure. Due to manufacturing tolerances, the actual weighed mass in running order may deviate from the value stated above. Deviations of up to ± 5 % of the mass in running order are legally permissible and possible. The permissible range in kilograms is given in brackets after the mass in running order. The manufacturer-specified mass for optional equipment is a calculated value for each type and layout that Dethleffs uses to determine the maximum weight available for factory-fitted optional equipment. The limitation of optional equipment is intended to ensure that the minimum pay-mass, i.e. the legally prescribed free mass for baggage and retrofitted accessories, is actually available for the vehicle load capacity of the vehicles delivered by Dethleffs. The real weight of your vehicle ex works can only be determined when it is weighed at the end of the line. If, in exceptional cases, the weighing shows that the actual load capacity falls below theminimum pay-mass despite limiting the optional equipment due to a permissible weight deviation, we will check together with your trade partner and you whether we should, for example, increase the load capacity of the vehicle, reduce the number of seats or remove optional equipment before delivering the vehicle. The technically permissible maximum laden mass of the vehicle and the technically permissible maximum mass on the axle must not be exceeded. Detailed information & explanations on the subject of weight and the configuration of the vehicle can be found in the section Legal information. For a more detailed description of all mandatory technical dependencies, please refer to the explanations on the footnotes.

*** INFO** The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for optional equipment shown in the model overviews. This is a calculated value for each type and layout that Dethleffs uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and explanations on the subject of weight can be found in the Legal information section.

WI-KO Winter Comfort Package

*** INFO** The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for optional equipment shown in the model overviews. This is a calculated value for each type and layout that Dethleffs uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and explanations on the subject of weight can be found in the Legal information section. An increase of load capacity increases the manufacturer-specified mass for optional equipment. The increase results from the higher pay-mass due to the alternative chassis. The increased tare weight of the alternative chassis and, in particular, the weight for any mandatory heavier engine variants (e.g. 180 hp) must be deducted from this. For a more detailed description of all mandatory technical dependencies, please refer to the explanations on the footnotes.

Trend Active Plus Low Profile

The Active Plus equipment line gives the Trend a whole new look: a distinctive exterior, a refreshed interior design with stylish light-beige leather-look upholstery, and an exceptional equipment package – all at an incredible price. Choose from three popular layouts, each available with either single beds or a double bed – as either a Low Profile or A Class motorhome. Bolder design, more equipment, more freedom – the Trend Active Plus brings a fresh feel to every journey.

Upholstery

Upholstery Polaris (textile leather)

Wood décor

Wood décor Ashton

Plus factors

- Lifetime Smart bodywork technology with a GRP roof and a 10-year watertightness guarantee
- Extensive standard chassis equipment including 16-inch alloy wheels, a 90-litre diesel fuel tank, a leather-trimmed steering wheel with controls, driver assistance systems, a rain and light sensor, a tyre pressure monitoring system, and a large moniceiver with Apple CarPlay, Android Auto and a reversing camera
- Dethleffs Exclusive rear light bracket with ShapeLine LED rear lights and integrated third brake light
- 70 cm wide living area door with convenient ‘coupé’ entry, a wide electric step and a fly-screen-fitted external door
- Active Plus interior design with a modern colour scheme and high-quality interior finish
- Modern gourmet kitchen with a tiled splashback, built-in shelving, a two-burner hob, a generous worktop, drawers, a cutlery tray, a bin and a MultiFlex rail system
- Fixed beds with ergonomic wooden slatted bases, 150 mm thick 7-zone premium mattresses, and an attractively designed sleeping area featuring indirect ambient lighting, wall-to-wall overhead cupboards and practical storage nets

*** INFO** The specified mass in running order is a default value defined in the type-approval procedure. Due to manufacturing tolerances, the actual weighed mass in running order may deviate from the value stated above. Deviations of up to ± 5 % of the mass in running order are legally permissible and possible. The permissible range in kilograms is given in brackets after the mass in running order. The manufacturer-specified mass for optional equipment is a calculated value for each type and layout that Dethleffs uses to determine the maximum weight available for factory-fitted optional equipment. The limitation of optional equipment is intended to ensure that the minimum pay-mass, i.e. the legally prescribed free mass for baggage and retrofitted accessories, is actually available for the vehicle load capacity of the vehicles delivered by Dethleffs. The real weight of your vehicle ex works can only be determined when it is weighed at the end of the line. If, in exceptional cases, the weighing shows that the actual load capacity falls below theminimum pay-mass despite limiting the optional equipment due to a permissible weight deviation, we will check together with your trade partner and you whether we should, for example, increase the load capacity of the vehicle, reduce the number of seats or remove optional equipment before delivering the vehicle. The technically permissible maximum laden mass of the vehicle and the technically permissible maximum mass on the axle must not be exceeded. Detailed information & explanations on the subject of weight and the configuration of the vehicle can be found in the section Legal information. For a more detailed description of all mandatory technical dependencies, please refer to the explanations on the footnotes.

AP-P Active Plus Package **WI-KO** Winter Comfort Package

*** INFO** The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for optional equipment shown in the model overviews. This is a calculated value for each type and layout that Dethleffs uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and explanations on the subject of weight can be found in the Legal information section. An increase of load capacity increases the manufacturer-specified mass for optional equipment. The increase results from the higher pay-mass due to the alternative chassis. The increased tare weight of the alternative chassis and, in particular, the weight for any mandatory heavier engine variants (e.g. 180 hp) must be deducted from this. For a more detailed description of all mandatory technical dependencies, please refer to the explanations on the footnotes.

Trend Active Plus A Class

The Active Plus equipment line gives the Trend a whole new look: a distinctive exterior, a refreshed interior design with stylish light-beige leather-look upholstery, and an exceptional equipment package – all at an incredible price. Choose from three popular layouts, each available with either single beds or a double bed – as either a Low Profile or A Class motorhome. Bolder design, more equipment, more freedom – the Trend Active Plus brings a fresh feel to every journey.

Upholstery

Upholstery Polaris (textile leather)

Wood décor

Wood décor Ashton

Plus factors

- Lifetime Smart bodywork technology with a GRP roof and a 10-year watertightness guarantee
- Extensive range of chassis features, including driver assistance systems, infotainment and a reversing camera
- 70 cm wide living room door with easy access and an electric step
- Panoramic roof hatch and 205 cm headroom for a spacious feel
- Modern Active Plus interior and AirPlus roof cupboard ventilation
- Flat Iso-Protect comfort floor with a large under-floor storage compartment
- A gourmet kitchen with plenty of worktop space and clever storage solutions
- Ergonomic fixed beds with premium mattresses and a pull-down bed in the cab as standard
- Large rear garage with lighting, a power socket and lashing rails
- Efficient heating and on-board technology with centralised heat distribution and a CP Plus control panel

○ Optional equipment — Not possible ● Standard equipment ◆ Mandatory △ Not known at the time of publication

*** INFO** The specified mass in running order is a default value defined in the type-approval procedure. Due to manufacturing tolerances, the actual weighed mass in running order may deviate from the value stated above. Deviations of up to ± 5 % of the mass in running order are legally permissible and possible. The permissible range in kilograms is given in brackets after the mass in running order. The manufacturer-specified mass for optional equipment is a calculated value for each type and layout that Dethleffs uses to determine the maximum weight available for factory-fitted optional equipment. The limitation of optional equipment is intended to ensure that the minimum pay-mass, i.e. the legally prescribed free mass for baggage and retrofitted accessories, is actually available for the vehicle load capacity of the vehicles delivered by Dethleffs. The real weight of your vehicle ex works can only be determined when it is weighed at the end of the line. If, in exceptional cases, the weighing shows that the actual load capacity falls below theminimum pay-mass despite limiting the optional equipment due to a permissible weight deviation, we will check together with your trade partner and you whether we should, for example, increase the load capacity of the vehicle, reduce the number of seats or remove optional equipment before delivering the vehicle. The technically permissible maximum laden mass of the vehicle and the technically permissible maximum mass on the axle must not be exceeded. Detailed information & explanations on the subject of weight and the configuration of the vehicle can be found in the section Legal information. For a more detailed description of all mandatory technical dependencies, please refer to the explanations on the footnotes.

Standard equipment

*** INFO** The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for optional equipment shown in the model overviews. This is a calculated value for each type and layout that Dethleffs uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and explanations on the subject of weight can be found in the Legal information section.

AP-P Active Plus Package **WI-KO** Winter Comfort Package

*** INFO** The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for optional equipment shown in the model overviews. This is a calculated value for each type and layout that Dethleffs uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and explanations on the subject of weight can be found in the Legal information section. An increase of load capacity increases the manufacturer-specified mass for optional equipment. The increase results from the higher pay-mass due to the alternative chassis. The increased tare weight of the alternative chassis and, in particular, the weight for any mandatory heavier engine variants (e.g. 180 hp) must be deducted from this. For a more detailed description of all mandatory technical dependencies, please refer to the explanations on the footnotes.

XL Coach built

The XL coachbuilt models make full use of the space above the cab, creating something you feel straight away: more freedom, more room, more possibilities. The result is a series of exceptional vehicle concepts for couples and families who want to enjoy every journey without compromise. Look forward to a noticeable boost in comfort, generous freedom of movement and cleverly designed storage solutions. Brand new: the inviting U-shaped seating lounges at the rear turn every camping space into a prime vantage point – with outstanding comfort and impressive panoramic views. Thanks to the double floor and standard hot-water heating, you'll feel cosy even in freezing temperatures. Hygge on four wheels – whatever the season.

Upholstery

Upholstery Floyd

Wood décor

Wood décor Noce Nagano

Plus factors

- Fully equipped: greater comfort, safety and self-sufficiency – just get in and go
- 180 hp (132 kW) MultiJet engine, 8-speed automatic transmission, cruise control, air conditioning and much more.
- Ideal driving characteristics: premium low-frame chassis with 145 mm lowering and a gross vehicle weight of up to 5.4 tonnes
- Extensive standard equipment: indirect ambient lighting, 6-metre awning, fridge, OmniVent in the kitchen area, DuoControl, central locking, moniceiver and two reversing cameras
- Absolute winterproof: double floor with frost-proof water installation
- Hot water heating for even heat distribution and a cosy feeling - even in icy temperatures
- Huge, heated rear garage with 250 kg surface load, loadable on both sides, anti-slip floor covering, lashing rails, lighting, 230 V socket
- Double-glazed flush-fitting windows
- AirPlus rear ventilation and Lifetime modular construction (aluminium side panels, XPS insulation)
- 10-year tightness guarantee!

*** INFO** The specified mass in running order is a default value defined in the type-approval procedure. Due to manufacturing tolerances, the actual weighed mass in running order may deviate from the value stated above. Deviations of up to ± 5 % of the mass in running order are legally permissible and possible. The permissible range in kilograms is given in brackets after the mass in running order. The manufacturer-specified mass for optional equipment is a calculated value for each type and layout that Dethleffs uses to determine the maximum weight available for factory-fitted optional equipment. The limitation of optional equipment is intended to ensure that the minimum pay-mass, i.e. the legally prescribed free mass for baggage and retrofitted accessories, is actually available for the vehicle load capacity of the vehicles delivered by Dethleffs. The real weight of your vehicle ex works can only be determined when it is weighed at the end of the line. If, in exceptional cases, the weighing shows that the actual load capacity falls below theminimum pay-mass despite limiting the optional equipment due to a permissible weight deviation, we will check together with your trade partner and you whether we should, for example, increase the load capacity of the vehicle, reduce the number of seats or remove optional equipment before delivering the vehicle. The technically permissible maximum laden mass of the vehicle and the technically permissible maximum mass on the axle must not be exceeded. Detailed information & explanations on the subject of weight and the configuration of the vehicle can be found in the section Legal information. For a more detailed description of all mandatory technical dependencies, please refer to the explanations on the footnotes.

Technic Package (14140)

Hydraulic lifting jacks with automatic levelling and weighing function	
Top View 360° HD camera	
Roof A/C	
Additional weight (kg)*	113

△Not known at the time of publication

*** INFO** The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for optional equipment shown in the model overviews. This is a calculated value for each type and layout that Dethleffs uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and explanations on the subject of weight can be found in the Legal information section.

Optional equipment*

○ Optional equipment — Not possible ● Standard equipment ◆ Mandatory △ Not known at the time of publication

*** INFO** The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for optional equipment shown in the model overviews. This is a calculated value for each type and layout that Dethleffs uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and explanations on the subject of weight can be found in the Legal information section. An increase of load capacity increases the manufacturer-specified mass for optional equipment. The increase results from the higher pay-mass due to the alternative chassis. The increased tare weight of the alternative chassis and, in particular, the weight for any mandatory heavier engine variants (e.g. 180 hp) must be deducted from this. For a more detailed description of all mandatory technical dependencies, please refer to the explanations on the footnotes.

XL A Class

Ready for big adventures – all year round: the XL I is the perfect A Class for families with a passion for travel. With 180 hp (132 kW), automatic transmission and a premium low-frame chassis, it delivers confident performance – even when fully loaded. The ALDE hot-water heating system, heated double floor and frost-protected installations ensure a warm and cosy interior even in freezing conditions. A gourmet kitchen, centre bathroom and durable body construction make it a true home from home for the whole family.

Upholstery

Upholstery Floyd

Wood décor

Wood décor Noce Nagano

Plus factors

- 180 hp (132 kW) MultiJet engine, 8-speed automatic transmission, cruise control, air conditioning and much more.
- Ideal driving characteristics: premium low-frame chassis with 220 mm lowering and 5.4 tonnes gross vehicle weight rating
- Extensive standard equipment: 6 seatbelts and Isofix, indirect ambient lighting, 6-metre awning, fridge with oven, OmniVent in the kitchen area, DuoControl, central locking, moniceiver and two reversing cameras
- Absolute winterproof: double floor with frost-proof water installation
- Hot water heating for even heat distribution and a cosy feeling - even in icy temperatures
- Huge, heated rear garage with 250 kg surface load, loadable on both sides, anti-slip floor covering, lashing rails, lighting, 230 V socket
- Double-glazed flush-fitting windows
- AirPlus rear ventilation and Lifetime modular construction (aluminium side panels, XPS insulation)
- 10-year tightness guarantee!

Technical info

XL A Class		I 7812-2
Standard chassis		Fiat Ducato Maxi AL-KO Low Platform 3-axle
Standard engine		180 MultiJet 3 Power
kW (bhp)		132 (180)
Emission standards		Euro VI-E
Overall length, approx.	cm	860
Overall width, approx.	cm	232
Overall height, approx.	cm	304
Headroom in living area, approx.	cm	208
Towable load braked/unbraked	kg	1800 / 750
Wheelbase, approx.	mm	4500
Bed dimension: Front bed, L x W, approx.	cm	196 x 150
Bed dimension: Central / middle bed, L x W, approx.	cm	210 x 93
Bed dimension: Rear bed, L x W, approx.	cm	2x 200 x 80 / 211 x 200
Sleeping berths standard / max.		5
Mass in running order (+/-5%)*	kg	3812 (3621 to 4003)*
Manufacturer-specified mass for optional equipment*	kg	1229
Technically permissible maximum laden mass*	kg	5400
Permitted number of seats (including driver)*		4 - 5 ○
Refrigerator volume (thereof freezer), approx.	l	137 (15)
Waste water tank, approx.	l	156
Fresh water tank capacity, total/ Fresh water tank capacity at driving filling	l	166 / 20
Measurement storage opening right (W x H)	cm	100 x 120
Measurement storage opening left (W x H)	cm	100 x 120

○ Optional equipment — Not possible ● Standard equipment ◆ Mandatory △ Not known at the time of publication

*** INFO** The specified mass in running order is a default value defined in the type-approval procedure. Due to manufacturing tolerances, the actual weighed mass in running order may deviate from the value stated above. Deviations of up to ± 5 % of the mass in running order are legally permissible and possible. The permissible range in kilograms is given in brackets after the mass in running order. The manufacturer-specified mass for optional equipment is a calculated value for each type and layout that Dethleffs uses to determine the maximum weight available for factory-fitted optional equipment. The limitation of optional equipment is intended to ensure that the minimum pay-mass, i.e. the legally prescribed free mass for baggage and retrofitted accessories, is actually available for the vehicle load capacity of the vehicles delivered by Dethleffs. The real weight of your vehicle ex works can only be determined when it is weighed at the end of the line. If, in exceptional cases, the weighing shows that the actual load capacity falls below theminimum pay-mass despite limiting the optional equipment due to a permissible weight deviation, we will check together with your trade partner and you whether we should, for example, increase the load capacity of the vehicle, reduce the number of seats or remove optional equipment before delivering the vehicle. The technically permissible maximum laden mass of the vehicle and the technically permissible maximum mass on the axle must not be exceeded. Detailed information & explanations on the subject of weight and the configuration of the vehicle can be found in the section Legal information. For a more detailed description of all mandatory technical dependencies, please refer to the explanations on the footnotes.

Standard equipment

| 7812-2

Fiat chassis

Alloy wheel FIAT 16", black (for 3-axle)	●
Fiat Ducato Maxi ALKO low platform 3-axle (5,400 kg) MultiJet 180 (2.2 l / 132 kW / 180 hp) Heavy Duty, 8-speed torque converter automatic transmission	●
Right-hand drive chassis	●

Fiat chassis features

ABS (anti-lock braking system) / EBD (electronic brakeforce distribution)	●
Additional protection for radiator through grille at front of vehicle	●
Anti-theft device	●
Automatic Brake Assist after a collision	●
Automatic Emergency Braking System (AEBS), Emergency Lane Keeping Assist, Driver Fatigue Detection, Intelligent Speed Assistance, Traffic Sign Recognition	●
Automatic cab air conditioning, digital speedometer with 7" instrument cluster and wireless phone charger in the centre console	●
Captain seats for driver and front passenger, swivel function	●
Chassis in right-hand drive version	●
Crosswind Assist	●
Cruise control	●
Cup holder in the centre of the dashboard	●
Dashboard with aluminium application	●
Diesel tank 90 litre incl. 19L AdBlue tank	●
Driver and passenger airbags	●
Driver and passenger detection	●
ESP incl. ASR, Traction Plus, Hill Holder and Hill Descent Control	●
Front-wheel drive	●
Height and tilt adjustment and double armrests for driver and passenger seat	●
LED daytime running lights	●
Leather steering wheel and gear knob withleather sleeve	●
Low-vibration coach-style exterior mirrors that can be heated and adjusted electrically (two-piece)	●
Padded double armrests, fabric cover	●
Pleated privacy blind in the windscreen can be adjusted horizontally and laterally for the best insulation	●
Rear axle mudflaps	●
Right-hand drive with exhaust on the left side	●
Steering wheel with control elements	●
Trailer Stability Assist	●
Tyre Pressure Monitoring System	●
Tyre inflation kit and towing eye	●
Tyres M+S Camping (with snowflake)	●

Exterior features

Dethleffs Exclusive rear light carrier with ShapeLine LED taillights, 3rd brake light integrated in rear spoiler and retracted rear wall	●
70 cm wide habitation door	●
Access to the habitation with comfortable coupe entry and wide, electric step	●
Double floor storage, some of which can be loaded across almost the entire vehicle width	●

Standard equipment

	I 7812-2
Double-glazed flush-fitting windows with blackout & mosquito protection	●
Driver's cab door left	●
Exterior design GT (rear light moulding with black diffuser, front I-paint partly black, radiator grille with chrome piping, skidplate "red")	●
Floor thickness: 43 mm, side wall thickness: 34mm and roof thickness: 35 mm	●
Flyscreen habitation door	●
GRP roof	●
Habitation access with comfortable, wide, electric step	●
Habitation door with window incl. blackout and central locking (incl. cab door)	●
Large rear garage: two garage doors/flaps with turn/tighten lock, rear lowering (250 kg surface load), anti-slip surface, heated, lashing strips, illuminated, 1x 230 V socket	●
Lifetime construction technology: Tried-and-tested reliable flooring and superstructure with excellent insulation	●
Omnistor cassette awning 6.0 m (manual) [22)]	●
Panorama skylight 70 x 50 cm in the living area	●
Panoramic skylight 40x40 cm with flyscreen and blackout blinds above the pull-down bed	●
Roof vent with fan	●
Side panels and rear panel in smooth aluminium sheets	●
Skylight 40 x 40 cm above rear bed	●
XPS insulation	●
Exterior design	
Exterior body painted in white	●
Interior design	
Upholstery Floyd	●
Wood décor Noce Nagano	●
Furniture layouts	
AirPlus overhead locker rear ventilation to avoid condensation	●
Bed convert for seating lounge transverse	●
Cosy L-shaped seating group with free-standing, lowerable table base and 2 integrated 3-point belts	●
Fixed beds with ergonomic wooden slatted frames and 110 mm thick 7-zone premium mattresses made from climate-regulating material	●
High-level single beds incl. comfortable access via steps	●
Isofix child seat attachment for 3rd and 4th seats in the direction of travel	●
Manual pull-down bed in the driver's cab	●
No steps in living room	●
Option to convert single beds to double bed	●
Overhead locker doors with soft-close function	●
Wardrobe floor-to-ceiling with convenient linen drawers in upper area	●
Kitchen	
Fridge (137 l) with integrated oven [23)]	●
Gourmet kitchen: 2-burner stove, spacious drawers, cutlery tray, waste bin and generous work surface	●
Kitchen backsplash	●
MultiFlex rail system incl. hooks (further accessories via Dethleffs Original Accessories)	●

Standard equipment

| 7812-2

Bathroom

Equipped with cabinets, storage compartments, hooks, large mirrors and a height-adjustable shower head	●
Shower grate	●
Shower panel and bathroom accessories in black	●
Window in bathroom	●

Multimedia

DAB+ radio antenna mounted on the roof	●
Dethleffs Naviceiver incl. DAB+, truck navigation, wireless Apple CarPlay and Android Auto	●
Flat-screen TV bracket	●
Integrated single-lens rear view camera	●
Preparation for radio system incl. sound package in the driver's cabin	●
Second rear view camera in rear moulding	●

Heating

Heat exchanger for hot-water heating	●
Hot-water carpet for the driver's cab	●
Hot-water heating with boiler, automatic drain valve and shut-off valve for the sleeping area and digital control panel	●

Air Conditioning

Pre-wiring for roof A/C	●

Electrical installation

Automatic switch-on/disconnect for starter battery, leisure battery and refrigerator	●
Awning light 12 V	●
Dethleffs connect - System Control Unit Lite	●
EBL with separate FI protection switch	●
LED lighting throughout the vehicle	●
Leisure battery AGM, 95 Ah	●
Light Moments: Clad seat chest side with indirect lighting	●
Light Moments: Indirect ambient lighting above the overhead lockers	●
Light Moments: Indirect wall surface ambient lighting	●
Light Moments: illuminated kitchen splashback	●
Number of sockets 1x 12V, 7x 230V, 4x USB	●
Pre-wiring for solar	●
Premium on-board control panel with touchscreen	●
Spotlights in the roof lining above the habitation door	●

Water supply

Fresh water and waste water tanks fitted in the double floor (insulated and heated compartment)	●
Submersible pump	●
Switch for water pump	●

Gas supply

Automatic gas cylinder switchover incl. crash sensor and EisEx	●
Outdoor gas socket gas pressure 30 mbar	●

Standard equipment

Storage space for 2 gas bottles with a filling weight of 11 kg each	●
Safety	
Smoke detector	●

○ Optional equipment — Not possible ● Standard equipment ◆ Mandatory △ Not known at the time of publication

*** INFO** The specified mass in running order is a default value defined in the type-approval procedure. Due to manufacturing tolerances, the actual weighed mass in running order may deviate from the value stated above. Deviations of up to ± 5 % of the mass in running order are legally permissible and possible. The permissible range in kilograms is given in brackets after the mass in running order. The manufacturer-specified mass for optional equipment is a calculated value for each type and layout that Dethleffs uses to determine the maximum weight available for factory-fitted optional equipment. The limitation of optional equipment is intended to ensure that the minimum pay-mass, i.e. the legally prescribed free mass for baggage and retrofitted accessories, is actually available for the vehicle load capacity of the vehicles delivered by Dethleffs. The real weight of your vehicle ex works can only be determined when it is weighed at the end of the line. If, in exceptional cases, the weighing shows that the actual load capacity falls below theminimum pay-mass despite limiting the optional equipment due to a permissible weight deviation, we will check together with your trade partner and you whether we should, for example, increase the load capacity of the vehicle, reduce the number of seats or remove optional equipment before delivering the vehicle. The technically permissible maximum laden mass of the vehicle and the technically permissible maximum mass on the axle must not be exceeded. Detailed information & explanations on the subject of weight and the configuration of the vehicle can be found in the section Legal information. For a more detailed description of all mandatory technical dependencies, please refer to the explanations on the footnotes.

Standard equipment

	A 6820-2	A 7820-2
Fiat chassis		
Alloy wheel FIAT 16", black (for 3-axle)	–	●
Fiat Ducato Maxi ALKO low platform (4,800 kg incl. air suspension rear axle, reinforced springs, aluminium rims) MultiJet 180 (2.2 l / 132 kW / 180 hp) Heavy Duty, 8-speed torque converter automatic transmission	●	–

Right-hand drive chassis	●	●
Weight upgrade		
Single folding seats rear right and left incl. Isofix	●	–
Fiat chassis features		
ABS (anti-lock braking system) / EBD (electronic brakeforce distribution)	●	●
Anti-theft device	●	●
Automatic Brake Assist after a collision	●	●
Automatic Emergency Braking System (AEBS), Emergency Lane Keeping Assist, Driver Fatigue Detection, Intelligent Speed Assistance, Traffic Sign Recognition	●	●
Automatic cab air conditioning, digital speedometer with 7" instrument cluster and wireless phone charger in the centre console	●	●
Cab blackout blinds	●	●
Captain seats for driver and front passenger, swivel function	●	●
Chassis in right-hand drive version	●	●
Crosswind Assist	●	●
Cruise control	●	●
Cup holder in the centre of the dashboard	●	●
DAB+ radio antenna integrated into right exterior mirror	●	●
Dashboard with aluminium application	●	●
Daytime running lights integrated into headlights	●	●
Diesel tank 90 litre incl. 19L AdBlue tank	●	●
Driver and passenger airbags	●	●
Driver and passenger detection	●	●
ESP incl. ASR, Traction Plus, Hill Holder and Hill Descent Control	●	●
Electrically adjustable and heated exterior mirrors incl. blind spot mirror and integrated turn indicator	●	●
Exterior colour chassis white	●	●
Fog lights incl. cornering light	●	●
Front-wheel drive	●	●
Full LED low beam	●	●
Height and tilt adjustment and double armrests for driver and passenger seat	●	●
Leather steering wheel and gear knob withleather sleeve	●	●
Padded double armrests, fabric cover	●	●
Painted front bumper in body colour incl. black skid plate	●	●
Preparation for radio system incl. loudspeakers in the driver's cabin	●	●
Rain and light sensor with automatic dimming	●	●
Rear corner steadies (2 pieces)	●	●
Right-hand drive with exhaust on the left side	●	●

Standard equipment

	A 6820-2	A 7820-2
Seat bench incl. two 3-point seat belts facing away from the direction of travel incl. bed construction Seating area	–	●
Steering wheel with control elements	●	●
Trailer Stability Assist	●	●
Tyre Pressure Monitoring System	●	●
Tyre inflation kit and towing eye	●	●
Tyres M+S Camping (with snowflake)	●	●
Exterior features		
70 cm wide living room door with window and blackout, electric closing aid and gas pressure damper as hold-open device	●	●
Access to the habitation with comfortable coupe entry and wide, electric step	●	●
Central locking for the drive's cab, habitation and garage door	●	●
Dethleffs Exclusive rear light carrier with ShapeLine LED taillights and 3rd brake light integrated in rear spoiler	●	●
Double floor storage, some of which can be loaded across almost the entire vehicle width	●	●
Double-glazed flush-fitting windows with blackout & mosquito protection	●	●
Floor thickness: 43 mm, side wall thickness: 34mm and roof thickness: 35 mm	●	●
Flyscreen habitation door	●	●
GRP roof	●	●
Habitation access with comfortable, wide, electric step	●	●
Lifetime Plus construction technology: rot-free superstructure with no wood inserts, XPS insulation with GRP cladding on the underslung and roof	●	●
Opening window in overcab right	●	●
Panoramic skylight 75x105 cm above U-shaped seating	–	●
Rear garage: 2 garage doors with one-hand operation, rear lowering (250 kg), heated, lashing rails, LED light across entire width, 230 V socket, GRP anti-slip flooring and walls with fleece	●	●
Side panels and rear panel in smooth aluminium sheets	●	●
Sky Roof (2 x panoramic skylight 70x50cm crossways) over the seating lounge in the rear	●	–
Sky roof (second panoramic skylight 75x105cm lengthwise over the seating lounge in the rear) incl. roof lining and lamp	–	●
Exterior design		
Exterior body painted in white	●	●
Interior design		
Upholstery Samir	●	●

Overhead locker doors with soft-close function	●	●
Overhead lockers in the rear area	●	●
U-shaped seating in the lounge with free-standing, rigid table base and surrounding seating and backrest cushions with flexible headrest	–	●
U-shaped seating with free-standing, rigid table base and surrounding seating and backrest cushions with flexible headrest	●	–
Wardrobe floor-to-ceiling with convenient linen drawers in upper area	–	●
Kitchen		
Extractor fan (extracted air) with draught stopper	●	●
Fridge (153 l), can be opened on both sides, with integrated oven	●	–
Fridge (177 l), can be opened on both sides, with integrated oven	–	●
Gourmet kitchen: 3-burner hob, generous drawers with soft-close mechanism, chopping board, pull-out larder unit, waste bin and central locking	●	●
Kitchen overhead locker with illuminated roof lining	●	●
Bathroom		
Equipped with cabinets, storage compartments, hooks, large mirrors and a height-adjustable shower head	●	●
Large bathroom with separate shower and toilet with locking door to the lounge	●	●
Shower grate	●	●
Shower panel and bathroom accessories in black	●	●
Multimedia		
Dethleffs Naviceiver incl. DAB+, truck navigation, wireless Apple CarPlay and Android Auto	●	●
Flat-screen TV bracket	●	●
Integrated single-lens rear view camera	●	●
Pre-wiring for satellite system	●	●
Pre-wiring for second rear view camera	●	●
Heating		
Heating in the seating unit for optimum heat distribution, built-in	●	●
Hot-water heating with boiler, automatic drain valve and shut-off valve for the sleeping area and digital control panel	●	●
Air Conditioning		
Pre-wiring for roof A/C	●	●
Electrical installation		
Automatic switch-on/disconnect for starter battery, leisure battery and refrigerator	●	●
Awning light 12 V	●	●
EBL with separate FI protection switch	●	●
LED lighting throughout the vehicle	●	●
Leisure battery AGM, 95 Ah	●	●
Light Moments: Illuminated wardrobe	●	●
Light Moments: Indirect ambient lighting above the overhead lockers	●	●
Light Moments: Indirect lighting in the bathroom with illuminated shower panel	●	●
Light Moments: Indirect wall surface ambient lighting	●	●
Light Moments: Pedestal lighting in the kitchen	●	●
Luxus on-board control panel	●	●

Standard equipment

	A 6820-2	A 7820-2
Number of sockets 1x 12V, 6x 230V, 2x USB	●	—
Number of sockets 1x 12V, 7x 230V, 2x USB	—	●
Pre-wiring for solar	●	●
Spotlights in the roof lining above the habitation door	●	●
Water supply		
Fresh water and waste water tanks fitted in the double floor (insulated and heated compartment)	●	●
Pressurized water pump system	●	●
Switch for water pump	●	●
Gas supply		
Automatic gas cylinder switchover incl. crash sensor and EisEx	●	●
Storage space for 2 gas bottles with a filling weight of 11 kg each, with simplified access	●	●
Safety		
Smoke detector	●	●

*** INFO** The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for optional equipment shown in the model overviews. This is a calculated value for each type and layout that Dethleffs uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and explanations on the subject of weight can be found in the Legal information section.

○ optionally available

Plus factors

- 180 hp (132 kW) Multijet, 8-speed automatic transmission with torque converter, automatic climate control, leather-trimmed multifunction steering wheel – combined with a chassis including driver assistance systems
- Ideal driving characteristics: Premium low-frame chassis with 220 mm lowering and up to 4.8 t or 5.4 t permissible gross weight
- Absolute winter resistance due to heated raised floor with installation laid frost-protected
- Hot water heating as standard. Comfortable warmth even at the frostiest temperatures. Ideal for allergy sufferers, as no dust whirling up.
- Lifetime Plus superstructure technology with absolutely rot-proof and durable wall construction
- Huge panoramic round seating area with plenty of space to eat and linger
- Electric single pull-down bed, 2 x 210 x 75 cm sleeping area, including large steps for safe access
- 10-year tightness guarantee!

*** INFO** The specified mass in running order is a default value defined in the type-approval procedure. Due to manufacturing tolerances, the actual weighed mass in running order may deviate from the value stated above. Deviations of up to ± 5 % of the mass in running order are legally permissible and possible. The permissible range in kilograms is given in brackets after the mass in running order. The manufacturer-specified mass for optional equipment is a calculated value for each type and layout that Dethleffs uses to determine the maximum weight available for factory-fitted optional equipment. The limitation of optional equipment is intended to ensure that the minimum pay-mass, i.e. the legally prescribed free mass for baggage and retrofitted accessories, is actually available for the vehicle load capacity of the vehicles delivered by Dethleffs. The real weight of your vehicle ex works can only be determined when it is weighed at the end of the line. If, in exceptional cases, the weighing shows that the actual load capacity falls below theminimum pay-mass despite limiting the optional equipment due to a permissible weight deviation, we will check together with your trade partner and you whether we should, for example, increase the load capacity of the vehicle, reduce the number of seats or remove optional equipment before delivering the vehicle. The technically permissible maximum laden mass of the vehicle and the technically permissible maximum mass on the axle must not be exceeded. Detailed information & explanations on the subject of weight and the configuration of the vehicle can be found in the section Legal information. For a more detailed description of all mandatory technical dependencies, please refer to the explanations on the footnotes.

Standard equipment

	I 6820-2	I 7820-2
Fiat chassis		
Alloy wheel FIAT 16", black (for 3-axle)	–	●
Fiat Ducato Maxi ALKO low platform (4,800 kg incl. air suspension rear axle, reinforced springs, aluminium rims) MultiJet 180 (2.2 l / 132 kW / 180 hp) Heavy Duty, 8-speed torque converter automatic transmission	●	–

Bed convert for seating lounge transverse	–	●
Bed convert for seating lounge transverse	●	–
Electric pull-down bed for single-bed use (without add-on elements)	●	●
Full body mirror	●	●
Overhead locker doors with soft-close function	●	●
Overhead lockers in the rear area	●	●
U-shaped seating in the lounge with free-standing, rigid table base and surrounding seating and backrest cushions with flexible headrest	–	●
U-shaped seating with free-standing, rigid table base and surrounding seating and backrest cushions with flexible headrest	●	–
Wardrobe floor-to-ceiling with convenient linen drawers in upper area	–	●
Kitchen		

Standard equipment

	I 6820-2	I 7820-2
Extractor fan (extracted air) with draught stopper	●	●
Fridge (153 l), can be opened on both sides, with integrated oven	●	–
Fridge (177 l), can be opened on both sides, with integrated oven	–	●
Gourmet kitchen: 3-burner hob, generous drawers with soft-close mechanism, chopping board, pull-out larder unit, waste bin and central locking	●	●
Kitchen overhead locker with illuminated roof lining	●	●
Bathroom		
Equipped with cabinets, storage compartments, hooks, large mirrors and a height-adjustable shower head	●	●
Large bathroom with separate shower and toilet with locking door to the lounge	●	●
Shower grate	●	●
Shower panel and bathroom accessories in black	●	●
Multimedia		
DAB+ radio antenna mounted on the roof	●	●
Dethleffs Naviceiver incl. DAB+, truck navigation, wireless Apple CarPlay and Android Auto	●	●
Flat-screen TV bracket	●	●
Integrated single-lens rear view camera	●	●
Pre-wiring for satellite system	●	●
Pre-wiring for second rear view camera	●	●
Preparation for radio system incl. sound package in the driver's cabin	●	●
Heating		
Heating in the seating unit for optimum heat distribution, built-in	●	●
Hot-water heating with boiler, automatic drain valve and shut-off valve for the sleeping area and digital control panel	●	●
Air Conditioning		
Pre-wiring for roof A/C	●	●
Electrical installation		
Automatic switch-on/disconnect for starter battery, leisure battery and refrigerator	●	●
Awning light 12 V	●	●
EBL with separate FI protection switch	●	●
LED lighting throughout the vehicle	●	●
Leisure battery AGM, 95 Ah	●	●
Light Moments: Illuminated wardrobe	●	●
Light Moments: Indirect ambient lighting above the overhead lockers	●	●
Light Moments: Indirect lighting in the bathroom with illuminated shower panel	●	●
Light Moments: Indirect wall surface ambient lighting	●	●
Light Moments: Pedestal lighting in the kitchen	●	●
Luxus on-board control panel	●	●
Number of sockets 1x 12V, 6x 230V, 2x USB	●	–
Number of sockets 1x 12V, 7x 230V, 2x USB	–	●
Pre-wiring for solar	●	●
Spotlights in the roof lining above the habitation door	●	●

Standard equipment

	I 6820-2	I 7820-2
Water supply		
Fresh water and waste water tanks fitted in the double floor (insulated and heated compartment)	●	●
Pressurized water pump system	●	●
Switch for water pump	●	●
Gas supply		
Automatic gas cylinder switchover incl. crash sensor and EisEx	●	●
Storage space for 2 gas bottles with a filling weight of 11 kg each, with simplified access	●	●
Safety		
Smoke detector	●	●

*** INFO** The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for optional equipment shown in the model overviews. This is a calculated value for each type and layout that Dethleffs uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and explanations on the subject of weight can be found in the Legal information section.

95-P 95 Years Package **GT** GT Package

*** INFO** The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for optional equipment shown in the model overviews. This is a calculated value for each type and layout that Dethleffs uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and explanations on the subject of weight can be found in the Legal information section. An increase of load capacity increases the manufacturer-specified mass for optional equipment. The increase results from the higher pay-mass due to the alternative chassis. The increased tare weight of the alternative chassis and, in particular, the weight for any mandatory heavier engine variants (e.g. 180 hp) must be deducted from this. For a more detailed description of all mandatory technical dependencies, please refer to the explanations on the footnotes.

Water filter - installation kit without pump	—	1	3345951	○	○

○ Optional equipment — Not possible ● Standard equipment ◆ Mandatory △ Not known at the time of publication

*** INFO** The items listed in this category are original Dethleffs parts and accessories that are retrofitted to the vehicle after delivery from the factory and not under the responsibility of the manufacturer. Original Dethleffs parts and accessories retrofitted to the vehicle affect the load capacity as well as the mass on the axle. Please note that the technically permissible maximum laden mass of the vehicle as well as the technically permissible maximum laden mass on the axle must not be exceeded even after fitting the original Dethleffs parts and accessories. Detailed information and explanations on the subject of weight can be found in the Legal information section.

Legal notes on weight-related information

The weight specifications and tests for **motorhomes** are uniformly regulated throughout the EU in EU Implementing Regulation No. 2021/535 (until June 2022: EU Implementing Regulation No. 1230/2012). We have summarised and explained the key terms and legal requirements from this **regulation** for you below. Our **dealers** and the Dethleffs configurator on our website offer you additional assistance in configuring your vehicle.

1. Technically permissible maximum laden mass

The **technically permissible maximum laden mass** of the vehicle (e.g. 3,500 kg) is a mass specification set by the manufacturer which the vehicle must not exceed. Information on the **technically permissible maximum laden mass** of the model you have chosen can be found in the technical data. If the vehicle exceeds the **technically permissible maximum laden mass** in everyday driving, this constitutes an administrative offence which may result in a fine.

2. Mass in running order

In simple terms, the **mass in running order** is the basic vehicle with **standard equipment** plus a legally fixed standard weight of 75 kg for the driver. This essentially includes the following items:

- the unladen weight of the vehicle together with the bodywork, including operating fluids such as greases, oils and coolants;
- the **standard equipment**, i.e. all equipment items that are included as standard in the factory-fitted scope of delivery;
- the fresh water tank filled to 100 % in driving mode (driving fill according to manufacturer's specifications;) and an aluminium gas cylinder filled to 100 %;
- the **fuel tank**, which is 90 % full, including fuel;
- the driver, whose weight – regardless of the actual weight – is generally specified as 75 kg in accordance with EU law.

Information on the **mass in running order** can be found for each model in our sales documents. It is important to note that the value for **mass in running order** given in the sales documents is a default value determined in the **type-approval procedure** and verified by the authorities. It is legally permissible and possible for the **mass in running order** of the vehicle delivered to you to deviate from the nominal value stated in the sales documents. The legally permissible **tolerance** is ± 5 %. In this way, the EU legislator accounts for the fact that certain fluctuations in the **mass in running order** occur due to variations in the weight of supplied parts as well as due to processes and weather conditions.

These weight deviations can be illustrated by means of an example calculation:

- **Mass in running order** acc. to sales documents: 2,850 kg
- Legally permissible **tolerance** of ± 5 %: 142.50 kg
- Legally permissible range of **mass in running order**: 2,707.50 kg to 2,992.50 kg

The specific range of permissible weight deviations can be found foreach model in the technical data. Dethleffs makes great efforts to reduce weight variations to the minimum that is unavoidable for production reasons. **Deviations** at the upper and lower end of the range are therefore very rare; however, they cannot be completely ruled out technically, even with all optimisations. The real weight of the vehicle and compliance with the permissible **tolerance** is therefore checked by Dethleffs by weighing each vehicle at the **end of the line**.

3. Mass of the passengers

The **mass of the passengers** is set a standard value of 75 kg for each seat provided by the manufacturer, regardless of the actual weight of the passengers. The **mass of the driver** is already included in the **mass in running order** (see no. 2 above) and is therefore not included again. In the case of a **motorhome** with four **permitted seats**, the **mass of the passengers** is therefore 3 * 75 kg = 225 kg.

4. Optional equipment and actual mass of the vehicle

Optional equipment (also: additional equipment) includes, according to the legal definition, all optional equipment parts not included inthe **standard equipment** which are fitted to the vehicle under the responsibility of the manufacturer – i.e. ex works – and can be ordered by the customer (e.g. awning, bicycle or motorbike carrier, satellite system, solar system, oven, etc.). Information on the individual or package weights of the **optional equipment** that can be ordered can be found in our sales documents. **Optional equipment** in this sense does not include other **accessories** that are retrofitted by the **dealer** or you personally after the vehicle has been delivered ex works.

The **mass of the vehicle in running order** (see no. 2 above) and the mass of the **optional equipment** fitted to a specific vehicle at the factory are together referred to as the **actual mass**. You will find the corresponding information for your vehicle after handover under item 13.2 of the Certificate of Conformity (CoC). Please note that this specification also represents a standardised value. Since the **mass in running order** – as an element of the **actual mass** – is subject to a legally permissible **tolerance** of ± 5 % (see no. 2), the **actual mass** may also deviate accordingly from the stated nominal value.

5. Pay-mass and minimum pay-mass

The installation of optional equipment is also subject to technical and legal limits: Only so much optional equipment can be ordered and fitted at the factory that sufficient free weight remains for baggage and other accessories ("pay-mass") without exceeding the technically permissible maximum laden mass. The pay-mass is calculated by subtracting the mass in running order (nominal value according to sales documents, see no. 2 above), mass of the optional equipment and the mass of the passengers (see no. 3 above) from the technically permissible maximum laden mass (see no. 1 above).
The EU regulations stipulate a fixed minimum pay-mass for motorhomes, which must remain as a minimum for baggage or other non-factory-fitted accessories. This minimum pay-mass is calculated as follows:

Minimum pay-mass in kg ≥ 10 * (n + L)
Where: "n" is the maximum number of passengers plus the driver and "L" is the overall length of the vehicle in metres.
For a motorhome with a length of 6 m and 4 approved seats, the minimum pay-mass is therefore e.g. 10 kg * (4 + 6) = 100 kg.

To ensure that the **minimum pay-mass** is maintained, there is a maximum combination of **optional equipment** that can be ordered for each vehicle model. In the above example with a **minimum pay-mass** of 100 kg, the total mass of **optional equipment** for a vehicle with four **permitted seats** and a **mass in running order** of 2,850 kg should not exceed 325 kg:

	3,500 kg	**technically permissible maximum laden mass**
–	2,850 kg	mass in running order
–	3*75 kg	mass of the passengers
–	100 kg	minimum pay-mass
=	**325 kg**	**maximum permissible mass of optional equipment**

It is important to note that this calculation is based on the default value for **mass in running order** as defined in the **type-approval procedure**, without taking into account the permissible weight deviations for **mass in running order** (see no. 2 above). If the maximum permissible value for the **optional equipment** of (in the example) 325 kg is almost or completely exhausted, an upward weight deviation can therefore result in the **minimum pay-mass** of 100 kg being met mathematically using the default value for the **mass in running order**, although in fact there is no corresponding **load capacity**. Here, too, an example calculation for a vehicle with four seats, whose real weighed **mass in running order** is 2 % above the nominal value:

	3.500 kg	**technically permissible maximum laden mass**
–	2.907 kg	real weighed mass in running order (+ 2 % compared to the stated value of 2,850 kg)
–	3*75 kg	**mass of the passengers**
–	325 kg	**optional equipment** (maximum permissible value)
=	**43 kg**	**actual load capacity (< minimum pay-mass of 100 kg)**

In order to avoid such a situation, Dethleffs further reduces the maximum permissible weight of the total **optional equipment** that can be ordered on a model-specific basis. The limitation of **optional equipment** is intended to ensure that the **minimum pay-mass**, i.e. the legally prescribed free mass for **baggage** and retrofitted **accessories**, is actually available for the **vehicle load capacity** of the vehicles delivered by Dethleffs. Since the weight of a specific vehicle can only be determined when it is weighed at the **end of the line**, in very rare cases a situation may arise in which the **minimum pay-mass** at the **end of the line** is not guaranteed, despite this limitation of **optional equipment**. In order to guarantee the **minimum pay-mass** even in these cases, Dethleffs will check together with your **trade partner** and you before delivery of the vehicle whether, for example, the vehicle is loaded up, seats are reduced or **optional equipment** is removed.

6. Effects of tolerances of the mass in running order on the pay-mass

Regardless of the **minimum pay-mass**, you should note that unavoidable production-related fluctuations in the **mass in running order** – both upwards and downwards – have a mirror-image effect on the remaining **load capacity**: If you order our example vehicle (see no. 3. above), for example, with **optional equipment** with a total weight of 150 kg, the calculated **pay-mass** based on the default value for the **mass in running order** is 275 kg. The **load capacity** actually available may deviate from this value due to **tolerances** and may be higher or lower. If the **mass in running order** of your vehicle is, for example, permissibly 2 % higher than stated in the sales documents, the **load capacity** is reduced from 275 kg to 218 kg:

	3.500 kg	**technically permissible maximum laden mass**
–	2.907 kg	real weighed mass in **running order** (+ 2 % compared to the stated value of 2,850 kg)
–	3*75 kg	**mass of the passengers**
–	150 kg	**optional equipment** ordered for the specific vehicle
=	**218 kg**	**sactual load capacity**

As a precaution to ensure that the calculated **pay-mass** is actually given, you should therefore take the possible and permissible **tolerances** for the **mass in running order** into account when configuring your vehicle. We also recommend that you weigh the laden **motorhome** on a non-automatic scale before each journey and, taking the individual weight of the **passengers** into account, determine whether the **technically permissible maximum laden mass** and the **technically permissible maximum mass on the axle** are observed.

TECHNICAL INFORMATION / FOOTNOTES

If you order your vehicle with additional equipment, you should check whether it makes sense or is necessary to increase the vehicle's weight! The optional equipment partially replaces the standard equipment. Individual components of packages can also be ordered separately. Please note that this does not entitle you to the price advantage and may also extend the delivery time. Please contact your retail partner for more information.

Footnotes

1) Please note that the total height may increase due to additional roof structures and optional equipment..
2) The maximum towing capacity is reduced to 1900 kg in combination with the ‘weight upgrade to 3650 kg’ option.
3) The maximum surface load of the garage increases to 250 kg in combination with the "trailer coupling" option.
4) Only available in conjunction with the "Design Chassis Package" (15852) or the "8-speed automatic transmission with torque converter".
5) Only available in conjunction with item 3247019 Bike Carrier.
6) Only possible in combination with option 3235539 "Bike Carrier".
7) Not possible in combination with the option "Active Package"
8) Maximum towing capacity of 2,500 kg, subject to a maximum gross towing weight of 5,850 kg.
9) The ‘lowerable bike rack’ option is not available in combination with the ‘access ladder for roof rails incl. crossbars’ option.
10) The "4-ring hob and oven combination" (Fullcooker), code 15613, will be available to order from the December production run onwards.
11) The "4-ring hob and oven combination" option replaces some of the kitchen drawers.
12) The ‘4-ring hob and oven combination, 15613’ option replaces the standard storage space for 1 gas cylinder with a ‘2.75 kg capacity’ with one with an ‘11 kg capacity’.
13) The options “roof rails” (code 1755) and “access ladder for roof rails, including crossbar” (code 1754) are only available in combination
14) The "panorama skylight 70x50 cm in the living area" is in combination with the option "electric pull-down bed above the seating group" in the sleeping area and then there is a roof hood 40x40 cm above the pull-down bed
15) An optional seat must be considered as a regular seat when calculating the minimum payload and the mass of the passengers. In order to obtain an optional seat, it must be ensured that the minimum payload is still maintained and that all other legal mass values are complied with. Please contact our trade partners for detailed information.
16) The maximum trailer load is reduced to 1750 kg in combination with the option ‘Fiat Ducato Maxi Low-frame (4250 kg gross vehicle weight)’.
17) The ‘GRP lightweight leaf spring’ is not applicable in combination with the ‘Fiat Ducato Maxi low frame (4.250 kg)’ option.
18) The ‘roof vent with fan’ option replaces the standard ‘40 x 40 cm roof hood above the kitchen’.
19) The "70x50 cm panoramic skylight in the living area" is replaced by a "40x40 cm panoramic skylight" in combination with the "electric drop-down bed above the seating group" option (code 13738).
20) Only possible in combination with option 761 "hot water heating"
21) Not possible in combination with option 761 "Hot water heating"
22) The ‘Omnistor cassette awning (electric)’ option replaces the standard ‘Omnistor cassette awning (manual)’.
23) The "integrated oven" will be removed from the standard specification from the December production run onwards.
24) The standard 25 A charge booster is replaced by a 45 A charge booster.
25) For layout XL 6822 and XL 7822, the ‘roof air conditioning’ option replaces the standard ‘roof vent with fan’.
26) The "Top View 360° HD camera" option replaces the standard rear view cameras (1642 and 11541).
27) The Top View 360° HD camera provides a panoramic view to assist with manoeuvring. Due to the nature of the system, there may be blind spots and limitations in the display of the vehicle’s surroundings. It is not a substitute for the driver’s attention.
28) Your local trade partner will be happy to help you design and define the "Individual genuine leather".
29) Not possible in combination with the option "Macerator ceramic toilet with waste-holding tank" (Code 1625).
30) Naviceiver bereits in Active-Paket / 95 Jahre-Paket enthalten.
31) Only possible in combination with option "real leather upholstery"
32) Only possible in combination with option 7505 "captain's chair with air suspension from SKA"

General Information

The information on the scope of delivery, appearance, performance, dimensions and weights of the vehicles corresponds to the knowledge available at the time of going to press and to the European homologation regulations.

Technical changes in design and equipment as well as errors excepted. These Technical Information is valid from October 1st, 2026. Vehicle illustrations in this document may contain optional equipment subject to an extra charge. We expressly reserve the right to make changes. With the publication of this Technical Information, all previous technical documents lose their validity.
