ROBETA

feel the difference

WHAT DRIVES US?

Is it the relentless need to outdo ourselves
or is it our basic instinct that pushes us
to go one step further?

In truth, there is no one simple answer to this question,
but what we can assure you is thiW: we will always strive to be the best
we can possibly be, but we will never believe that we actually are.

THE NEW ADONIS

Based on the Mercedes Benz Sprinter, the new 5.93 m long Adonis with 190 hp base engine is the top-of-the-range model in the Robeta line-up. It is the epitome of luxury and prestige, while on the other hand its compactness, innovative ideas and utility make it the ideal partner for both everyday use and long adventure trips.

Measuring just under 6 m in length, it can accommodate up to 4 people and is the ideal van for those are looking for a little something more. Adonis comes with a fully equipped and configured chassis and includes all the equipment that Mercedes Benz has to offer. From the state-of-the-art audio-navigation system and the full range of assistance and safety systems (blind-spot monitoring, 360-degree camera, etc.), to the automatic closing of the electric sliding doors and high-performance LED daytime running lights and much more.

The equipment in the living area is also completely configured and includes a 100 Ah lithium-ion battery, a 230 W solar system, electric valves for waste and drinking water, a digital display controlling all electrical devices, etc.

MANY INNOVATIONS

The model includes a number of innovations, including a kitchen countertop made of genuine Kerrock (similar to granite), a "hidden" sink and a bathroom with an innovative 180-degree bi-folding glass door that brings the use of the bathroom space to a whole new level.

The left-hand door also serves as a night barrier between the living and sleeping areas. The van also features a number of innovative design solutions, such as the electric ceramic toilet that includes the "macerator" pump and a separate waste tank as commonly seen on large and prestigious yachts.

PAINT

OBSIDIAN BLACK - STANDARD

TENORIT GREY - STANDARD

SELENITE GREY - STANDARD

Technical guidelines

Robeta vans have a 7-year warranty on sealing and furniture (annual inspection) as well as 24-month vehicle guarantee, individual manufacturers' guarantee for technical devices.

The indication of dimensions and weight ranges from +/- 5% due to the use of natural raw materials. By installing, upgrading and modifying Robeta vehicles in unauthorized workshops, you compromise your safety and run the risk of losing your general operating license and Robeta warranty. For this reason, repair or upgrades should be carried out by an authorized Robeta specialist broker or dealer. Subsequent, technically feasible alterations and upgrades require additional installation and require additional costs.

As a last resort, additional desired combinations may be mutually exclusive. Robeta reserves the right to make technical changes to its construction, colour and fittings to the extent that this brings technical improvement.

Price list valid from 1st January 2024. The prices include 20% VAT.
